Proper Diaper Changing Procedures:

STOP DISEASE !

1. Protect surface of table with non-porous disposable paper. Have supplies ready and trash can ready.
2. Hold child with hands only and place on table.
3. Do not leave child unattended! Maintain one hand on child at all times.
4. Wipe the child's bottom from front to back, using each wipe only once.
5. Clean hands with a new wipe and diaper the child.
6. Wash your hands and child's hands with soap and water then shut the faucet off with a paper towel.
7. Return the child to group or safe place such as a carrier on the floor.
8. Clean diaper changing area and wash hands again, turning off faucet with towel.
