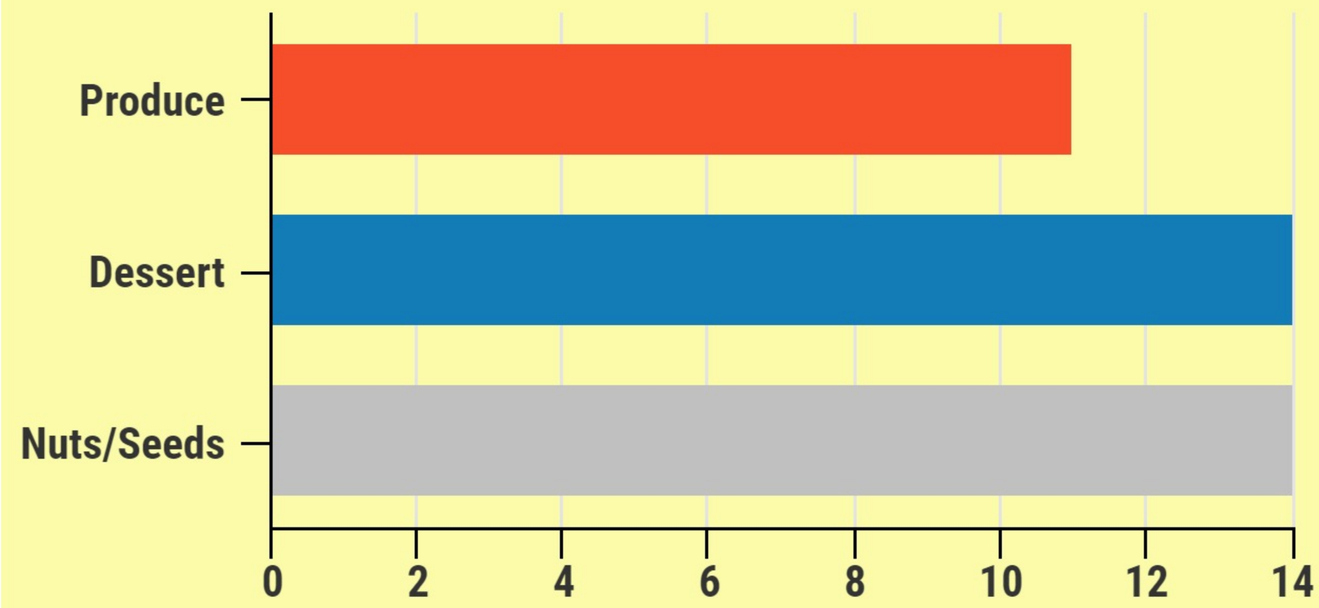
OF FOOD AND DRUGS IN 2016

Food and Drug Administration / U.S. Dept of Agriculture

Top 3 Recalled Categories in 2016 (represents 35% of all Montana recalls)



SENDS RECALL NOTICE

1650 est. recalls received by DPHHS

110 products DPHHS-FCS

DISTRIBUTION

Food and Consumer Safety Section personnel determine if the product was distributed in Montana

Alert Level	Category	Recall/Cat
1	Action Recommended	21
2	Discretionary	41
3	Advisory	45

ALERT LEVEL

Determines what kind of action should be taken by local environmental health offices. The top alert level means there is an illness or high risk of illness in Montana associated with it.

NOTIFICATION

FCS sends an e-mail to all local environmental health offices with the recall information, distribution and alert level.

MONTANA DPHHS
Healthy People. Healthy Communities.
Department of Public Health & Human Services

ACTION

Action from the local environmental health office may include contacting local facilities to make sure the product has been removed from shelves, notifying facilities that may have received the product, and supplying information to the public.
