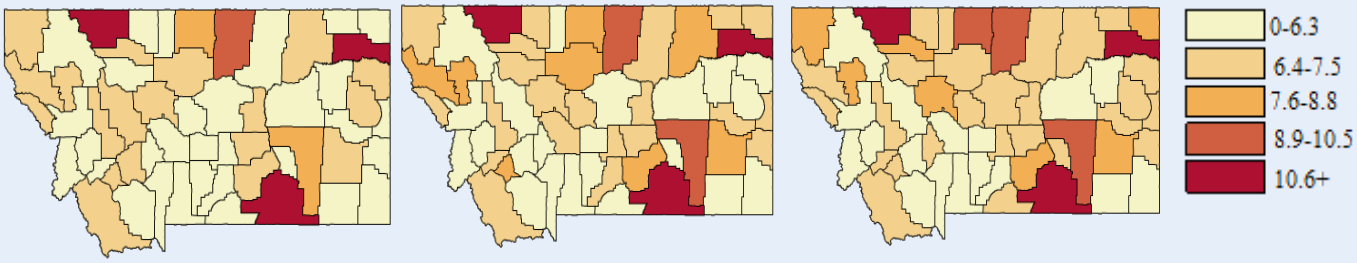
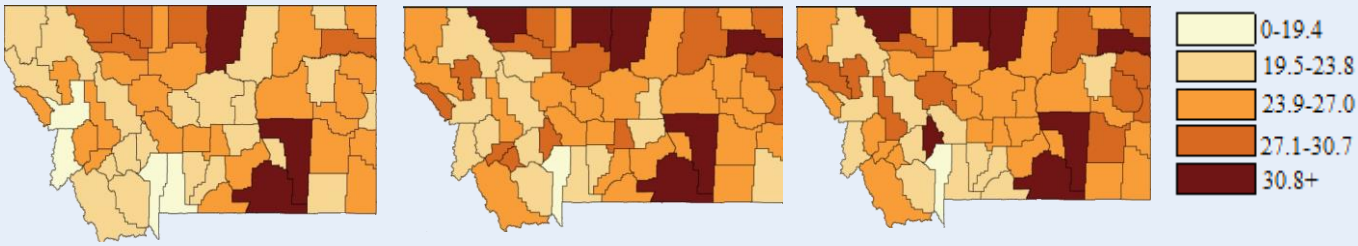
MT Quick Stats

Geographic Distribution of Diagnosed Diabetes and Obesity Prevalence in Montana, 2008-2012

Diabetes Prevalence (%) by County



Obesity Prevalence (%) by County



Data source: Behavioral Risk Surveillance System, National Diabetes Surveillance System.
Note: Rates are age-adjusted to the 2000 US standard population.

- During 2008-2012, the percentage of MT adults with diagnosed diabetes and obesity prevalence grew across all counties.
- In 2012, the highest diagnosed diabetes prevalence was in Big Horn County (13.4%) and lowest in Gallatin County (4.5%). The state diabetes prevalence increased from 6.3% in 2008 to 6.7% in 2012.
- Obesity prevalence was highest in Roosevelt County (34.8%) and lowest in Gallatin County (16.5%). The state obesity prevalence increased from 23.5% in 2008 to 24.3% in 2012.
