Accreditation Overview

What is Accreditation?

The formal evaluation of an organization or program against best practice standards. It is both a status and a process:

As a Status

It signifies that an organization or program meets standards of quality set forth by the accrediting body.

As a Process

It involves an in-depth self-review of an organization or program against currently accepted best practice standards, an onsite visit by an evaluation team comprised of experts, and a subsequent review and decision by the accrediting body.

To top

What is a Standard?

A statement that articulates a level of quality developed by subject matter experts that will be implemented and maintained by an organization or program pursuing accreditation and an accredited organization or program.

To top

Value of COA Accreditation

Accreditation signifies that an organization or program is effectively managing its resources and providing the best possible services to all of its stakeholders.
