Promoting FIRST Relationships® (PFR) in Pediatric Primary Care 1 day Workshop

The workshop is FREE, hotel rooms are provided and travel will be reimbursed.

Date: Friday, July 28, 2017

Time: 8:30-5:00 p.m. Location: Bozeman Health

What is PFR in Pediatric Primary Care?

- A university based program adapted by pediatricians to help pediatric primary care providers support stable and secure early parent-child relationships
- A framework that operationalizes attachment and child development theory into applied practice and intervention strategies specifically for the pediatric office visit
- A curriculum that also provides well-child check handouts for each visit (newborn - three years old) for pediatricians to share with parents
- Consultation strategies to promote infant/toddler mental health

How can PFR help medical providers?

- UNDERSTAND how to promote and support stable and secure early parent-child relationships in everyday office visits
- BEGIN TO SEE attachment behaviors and elements of healthy relationships that are happening in patient encounters through the use of videos and case studies
- LEARN skills that can be used by medical providers to strengthen a caregiver-child relationship during both well child care and challenging behavior visits
- REALIZE how both parents and medical providers can feel an increased sense of competence and confidence in addressing the social-emotional health of young children with PFR-PPC

Target Audience: Pediatricians, Family Physicians, Midwives, Behavioral Health Clinicians, Family Nurse Practitioners, Care Managers, Family Health Providers, etc.
