

ACKNOWLEDGEMENTS

Montana BRFSS, 2011

The Centers for Disease Control and Prevention (CDC), Division of Behavioral Surveillance provided financial and technical support for developing the questionnaires, implementing the survey, and processing and weighting the data. CDC's financial support has greatly facilitated the Montana Department of Public Health and Human Services (DPHHS) ability to continually monitor health risk factors for preventable diseases, disabilities, and injuries, access to health care and use of preventive screenings, and other emerging health issues.

Special appreciation is extended to the telephone interviewers and staff of the University of Nebraska Medical Center and call center located in Lincoln, NE. Their dedication and experience has yielded high quality survey data for the Montana BRFSS.

To the citizens of the state of Montana, we thank you for your continued cooperation and willingness to participate in this very important health survey. The information you have provided regarding health risk behaviors is invaluable for assessing state trends for public health planning purposes and allowing us the ability to compare Montana's progress to the rest of the states and the nation.
