

# imMTrax: Mass Immunization Module

Montana Department of Health  
and Human Services

Public Health and Safety  
Division

Last Update 09/2015

# Mass Immunization Module,

## Background

The Mass Immunization module is a tool that can easily be implemented for use during vaccination clinics or mass immunization events. The module allows for rapid entry of immunizations given from designated vaccine groups.

The Mass Immunization Training includes functionality that is only available to *Integrated Sites*.

*Integrated Sites* are those that manually enter immunizations into imMTrax, with each dose administered deducting from their imMTrax-managed inventory upon entry.

For questions regarding whether your site is an *Integrated Site*, please contact the Montana Immunization Program.

# Mass Immunization Module, Background

To utilize the Mass Immunization module certain updates may be necessary to a site's imMTrax profile.

**Please contact the Immunization Program if  
your site is unable to operate the module:  
(406) 444-5580**
