

Montanans Helping Montanans

The Volunteer Registry is a secure, web-based database that offers a quick and efficient way to assist volunteer responses to local, regional, and statewide emergencies.

If a disaster or emergency requires volunteers to have special skills or capabilities, the Registry can assist with selecting and requesting those people who meet those needs.

For more information about registering as a volunteer or involving your organization, please contact your local or tribal health agency.

The Volunteer Registry is made possible by the Health Resources and Services Administration of the US Department of Health & Human Services and the Montana Department of Public Health and Human Services..
