Introduction

Substance use is a growing concern in the state of Montana, affecting individuals and families across the lifespan. This plan outlines strategic actions that our state can take to collectively address the issue of substance use from a public health perspective.

More than 100 people die every year from drug overdose in Montana. and almost 22,000 hospital or ER visits annually are attributable to alcohol and drug use. The impacts of substance use span every generation and cut across socioeconomic lines, from children in our foster care system to seniors prescribed opioids for chronic pain.

In a rural state like Montana, access to robust, evidence-based systems to prevent, treat and manage substance use disorders are limited. And yet, with tens of thousands of individuals in our state impacted by this issue, we must work collectively to develop solutions for our communities.

This plan outlines a series of targeted strategies in six key areas that Montanans can implement to lessen the impact of substance use in our state.

• Partnerships
• Prevention and Education
• Enforcement
• Monitoring
• Treatment
• Family and Community Resources

Letter from the Governor

We are in the midst of a significant public health crisis.

Drug overdose deaths have been on the rise nationally, and although alcohol abuse is more prevalent in Montana, opioid and methamphetamine use are a significant cause for concern as well. Drug overdoses are the third leading cause of injury-related death in Montana accounting for 1,334 deaths between 2003 and 2014.

This challenge strains our families, our hospitals and health care providers, our health, and our public safety. Montana mirrors the national average for opiate overdose deaths: 5.4 per 100,000 compared to the national rate of 5.5 per 100,000 in 2013-2014. More than 15% of Montana high school students report misusing a prescription opioid, and the number of arrests involving heroin has more than tripled since 2014. As a father and as governor, I’m committed to implementing the best tools to tackle this challenge — giving Montanans the treatment they need, while looking out for the most vulnerable among us.

Prior to Medicaid expansion, Montana did not have a significant role in covering and paying for the treatment of substance use disorders: treatment was only covered for those under the age of 21. The HELP Act provided us with a new and powerful tool to treat alcohol and drug use. Without Medicaid expansion, low-income people across Montana, many of whom are the working poor, would be left without access to care, with no pathway to affordable health coverage.

In addition to improving access to treatment, to help meet this challenge, the Montana Department of Public Health and Human Services formed a task force of more than 114 people representing 82 organizations ranging from medical professionals, law enforcement, public health and education, state agencies, and non-profit workers. Together, they have created a unified, state-wide strategic plan to combat substance misuse and abuse in Montana. This plan is a living document which will grow and be adapted as new partners and new evidence becomes available.

The plan developed by our multi-agency team focuses not only on preventing deaths, but finding treatment and support for those struggling with substance use disorders so that our communities may heal. Thank you for your continued work and collaboration.

Sincerely,

GOVERNOR STEVE BULLOCK
Developing this plan

This plan was developed through a collaborative process with partners statewide.

In the summer of 2016, the Montana Department of Public Health and Human Services (DPHHS) received three years of funding under the Data-Driven Prevention Initiative cooperative agreement from the Centers for Disease Control and Prevention. The primary objectives for the grant include:

- Improving data collection and analysis around opioid misuse, abuse, and overdose;
- Developing strategies that impact behaviors driving prescription opioid dependence and abuse; and
- Working with communities to develop more comprehensive opioid overdose prevention programs.

Utilizing this funding, DPHHS brought together state and external partners working on the issue of substance use to create a comprehensive prescription drug overdose and abuse prevention state plan. From November 2016 to August 2017, the Opioid Abuse Strategic Task Force met for five full day, in-person meetings to develop this plan utilizing a facilitated, participatory process. In all, a total of 114 individuals representing 82 agencies statewide participated in at least one of these meetings. As the meetings progressed, it became clear to Task Force partners that the group should develop a statewide plan to address all substance use disorders, incorporating strategies to address opioid misuse and abuse while acknowledging that many strategies are cross cutting and can be utilized to address substance use more broadly. The task force was renamed the Montana Substance Use Strategic Task Force to reflect this change.

After developing key areas for action and strategies over the course of the first four meetings, Substance Use Strategic Task Force members provided final comments on the draft plan at an in-person meeting in Helena on August 28th, 2017. The plan was finalized and published by DPHHS in November 2017. This interim strategic plan is a living document that will be updated to include additional metrics and strategies over time in response to new data, evidence and emerging trends.
Acknowledgements

The following individuals and organizations contributed to the development of this plan.

Diana Agre  Pondera County Health Service
Maggie Anderson  Lincoln County Drug Free Communities
Kenzie Antila  DPHHS Director’s Office, Prevention Resource Center
Zoe Barnard  DPHHS, Addictive and Mental Disorders Division
Amber Bell  DPHHS, Children’s Special Health Services Section
Kristina Bessenyey  Department of Corrections/Probation and Parole Division
Barbara Bessette  Gateway Community Services
Mary Lynne Billy Coyote  DPHHS, American Indian Health
Marcie Bough  Board of Pharmacy, Montana Prescription Drug Registry
Alaine Broadway  DPHHS, Men’s and Women’s Health Section
Jeremy Brokaw  DPHHS, Injury Prevention Program
David Bull Calf  Crystal Creek Lodge
David Campana  DPHHS, Health Resources Division
Kevann Campbell  Montana Medical Association
Shelly Carney  Open Aid Alliance

</table>
Substance Use in Montana

An estimated 64,000 Montanans have a substance use disorder.¹

Methamphetamine
- 46% of all open Child and Family Services placements have meth indicated.²
- 427% increase in meth violations from 2010-2015.¹⁰

Marijuana
- 20% of high school students report marijuana use in the last month.⁴
- 62% of Montana youth perceive smoking marijuana regularly as harmful.⁴

Illicit drugs
- 122K estimated number of Montanans aged 12+ using marijuana in the last year.⁵
- 57% of all drug violations are for marijuana.⁶
- 3% of Montanans aged 12+ (18,000 people) are dependent on or abusing illicit drugs.⁵
- 116 heroin arrests in Montana in 2015, up from 4 in 2005.¹⁴
- 5% of young adults aged 18-25 report using cocaine in the last year.⁵

Alcohol
- 7% of Montanans aged 12+ were dependent on or abusing alcohol in the last year.⁵
- 20% of Montana adults report binge drinking in the last year, compared to 16% of adults in the US.⁸
- 34% of all traffic fatalities in Montana are attributable to alcohol.¹⁰
- 390 alcohol attributable deaths annually.⁹

Marijuana
- 34% of all traffic fatalities in Montana are attributable to alcohol.¹⁰

Illicit drugs
- 3% of Montanans aged 12+ (18,000 people) are dependent on or abusing illicit drugs.⁵
- 116 heroin arrests in Montana in 2015, up from 4 in 2005.¹⁴
- 5% of young adults aged 18-25 report using cocaine in the last year.⁵

SUD Strategic Plan 2017

90% of Montanans with Substance Use Disorder are not receiving treatment.¹³
Opioid Use in Montana

Opioid use is the primary driver of drug overdose deaths in the state of Montana. Forty-four percent of all drug overdose deaths are attributable to opioids. Montana has made progress in recent years addressing prescription opioid misuse and abuse and reducing overdose deaths, though much more can be done to ensure that opioids are prescribed, taken and disposed of safely and that patients being transitioned off of high dose prescription opiates do not transition to illicit narcotics such as heroin.

Montana has 70 opioid prescriptions for every 100 residents.12

The number of Montana adults reporting non-medical use of pain relievers in the last year is decreasing1

The rate of opioid overdose deaths in Montana peaked in 2008-2009 and has decreased significantly since then, bucking national trends. Montana opioid overdose rate was 4.2 per 100,000 residents in 2014-2015.11

Since the year 2000, more than 700 Montanans have died from opioid overdose.11

One in seven high school students has taken prescription drugs without a doctor’s prescription.4
Plan Format

**Overall goals**

- By 2019:
  - Reduce the prescription opioid age-adjusted death rate in Montana from 4.2 to 3.8 per 1,000
  - Decrease the number of Montanans dependent on or abusing illicit drugs from 18,000 to 17,000
  - Increase the percent of Montanans dependent on or abusing illicit drugs who received treatment in the last year from 7% to 12%

**Focus Areas**

- Partnerships
- Prevention & Education
- Enforcement
- Monitoring
- Treatment
- Family & Community Resources

**Metrics**

- How will we measure overall progress in this focus area?

**Key Areas for Action**

- Within this focus area, where should we target our work?

**Strategies & Leads**

- What will we commit to do and who will lead the way?

**Criteria for strategies included in this plan**

- Evidence based & data driven
- Sustainable
- Realistic & achievable
- Comprehensive
- Multidisciplinary
- Trauma informed
- Empowers at-risk groups
Partnerships  
Focus Area One

**Overall Goal**
Increase coordination and data sharing across sectors to more effectively address substance abuse and misuse and reduce overdose deaths

### Metrics
- Number of Substance Use Strategic Task Force meetings annually.
  - **Current**: 5
  - **Goal**: Maintain

- Number of data systems accessed and analyzed through the Data Driven Prevention Initiative (DDPI)
  - **Current**: 4
  - **Goal**: Increase

### Key Area for Action #1
Support ongoing cross sector meetings between stakeholders working to address substance use disorder

### Strategies & Leads
- Convene the MT Substance Use Strategic Task Force four times per year
  - **Lead**: DPHHS DDPI

- Convene regular meetings between programmatic and data leaders in DPHHS, DOJ, OPI, DOC and other agencies to coordinate SUD efforts
  - **Lead**: DPHHS and DCI

- Coordinate work at the state level with local drug task force and substance use prevention groups as well as individuals and families with lived SUD experience
  - **Lead**: DPHHS DDPI
Key Area for Action #2

Strategies & Leads

Enhance cross sector surveillance of substance use and overdose

- Develop a prescription drug burden document that includes analysis of all major sources of available public health and justice system data related to SUD. **Lead | DPHHS DDPI**

- Publish regular surveillance reports on opioid and drug use among specific populations, and overdose prevention. **Lead | DPHHS DDPI**

- Establish data sharing agreements with the Board of Pharmacy to enhance public health surveillance. **Lead | DPHHS DDPI**

- Establish data sharing agreements with the Montana Board of Crime Control to understand trends in arrests and drug seizures. **Lead | DPHHS DDPI**

- Establish data sharing agreements with the Department of Corrections to track SUD among populations in correctional facilities. **Lead | DPHHS DDPI**

- Include opioid-specific surveillance questions in the Montana Behavioral Risk Factor Surveillance System and Pregnancy Risk Assessment Survey tools. **Lead | DPHHS**
Prevention and Education

Focus Area Two

**Overall Goal**
Increase prevention efforts to reduce the misuse and abuse of opioids and other substances in all Montana communities

**Metrics**

- **Youth pain prescription misuse, lifetime**
  
  *Source: Montana YRBS*
  
  **Current:** 14%  
  **Goal:** Decrease

- **Youth who intend to use alcohol, tobacco, and/or other drugs in the future**
  
  *Source: Prevention Needs Assessment*
  
  **Current:** 44%  
  **Goal:** Decrease

- **Youth alcohol use, past 30 days**
  
  *Source: Montana YRBS*
  
  **Current:** 33%  
  **Goal:** Decrease

- **Youth and adult binge drinking, past 30 days**
  
  *Source: Montana YRBS and BRFSS*
  
  **Current:** 18% and 19%  
  **Goal:** Decrease

- **Retail opioid prescription dispensing rate**
  
  *Source: QuintilesIMS Transactional Data Warehouse and PDMP*
  
  **Current:** 70 per 100  
  **Goal:** Decrease

- **Number of poison control calls for all analgesics, annually**
  
  *Source: Montana Poison Control Center*
  
  **Current:** 1136  
  **Goal:** Decrease
Support the development of evidence-based substance abuse and misuse prevention activities in Montana communities

- Support robust, well-funded community coalitions implementing evidence-based prevention activities under SAMHSA’s strategic prevention framework in all Montana communities
  Lead | Prevention Specialists, Montana DPHHS

- Support prevention specialists in Montana communities to implement evidence-based SUD prevention activities
  Lead | Coalition fiscal agents and DDPI funded mini-grants

- Support evidence-based SUD prevention work in schools
  Lead | Office of Public Instruction

Increase public awareness about the dangers of prescription misuse and the importance of proper storage and disposal of unused medications

- Implement a statewide public education campaign that includes harm reduction, storage and disposal messaging, targeting at-risk groups
  Lead | DPHHS DDPI and the Prevention Resource Center

- Increase awareness of prescription drop boxes and disposal bags statewide
  Lead | Prevention Specialists, Law Enforcement and Pharmacies

- Promote law enforcement prescription drug take-back events
  Lead | Prevention Resource Center, Prevention Specialists and community coalitions

- Develop and fund educational efforts targeted toward older adults
  Lead | DDPI and DPHHS Senior and Long Term Care Division
Key Area for Action

#3

Strategies & Leads

Decrease overprescribing of opioids through the promotion of the CDC’s “Guidelines for Prescribing Opioids”

- Increase the number of providers receiving education from the Know Your Dose website
  
  **Lead | Montana Medical Association**

- Support policies and programs to increase provider education on opioid prescribing guidelines and the use of other effective therapies/treatments for pain
  
  **Lead | DPHHS DDPI**

- Support policies to promote prescribing according to the CDC guidelines
  
  **Lead | DPHHS DDPI**

- Analyze Medicaid and private insurer claims data and workman’s compensation data to evaluate provider opiate prescribing practices in Montana and provide feedback to providers
  
  **Lead | DPHHS**

- Support policies requiring pharmacists to check identification before dispensing narcotics
  
  **Lead | DPHHS**

- Continue OUD Project Echo to support collaborative learning for treatment providers statewide
  
  **Lead | Billings Clinic**

- Implement dosage policy for morphine milligram equivalents for non-malignant pain for Medicaid clients in accordance with CDC guidelines
  
  **Lead | Montana Medicaid and Mountain Pacific Quality Health**
Enforcement

Focus Area Three

**Overall Goal**
Reduce the illegal distribution of drugs and strengthen partnerships between the justice system and treatment providers

**Metrics**

1. Offense rate for all drugs
   - **Source**: Montana Board of Crime Control
   - **Current**: 8.5/1,000 Montanans
   - **Goal**: Decrease

2. Number and capacity of drug treatment courts in Montana
   - **Source**: Office of the Court Administrator
   - **Current**: 33 courts, 381 participants/year
   - **Goal**: Increase

3. Number and capacity of diversion programs in Montana
   - **Source**: Montana Board of Crime Control
   - **Current**: No data
   - **Goal**: Increase

4. Number of jails and DOC facilities offering Medication Assisted Treatment
   - **Source**: Department of Corrections
   - **Current**: Pilot program starting at MT State Prison
   - **Goal**: Increase

**Key Area for Action #1**
Support enforcement and prosecution of drug trafficking, including pill diversion

**Strategies & Leads**

1. Support criminal interdiction teams to reduce drug trafficking
   - **Lead**: Montana Highway Patrol

2. Support the work of the Montana Fusion Center and Pill Diversion Agents
   - **Lead**: Montana Division of Criminal Investigation
Key Area for Action #2

Increase access to drug courts, diversion and peer support programs in the Montana justice system

- Identify communities that are underserved by drug courts and support the development of treatment courts in these communities.
  Lead | Office of the Court Administrator

- Support the development of diversion programs that safely and appropriately divert substance use offenders out of the justice system and to evidence based treatment
  Lead | Montana Board of Crime Control

- Support the development of peer support/crisis diversion programs with local law enforcement agencies
  Lead | Montana Peer Support Network

Key Area for Action #3

Increase the number of jails and DOC facilities providing evidence-based SUD treatment, including Medication Assisted Treatment

- Increase the number of jails in Montana that provide access to SUD treatment, including MAT
  Lead | Montana Board of Crime Control

- Increase access to evidence-based treatment in Department of Corrections run and contracted facilities, including MAT
  Lead | Montana Department of Corrections

- Support policies to support continuity of SUD treatment and MAT for individuals being released from protective custody.
  Lead | Montana Department of Corrections, DPHHS and Medicaid
Monitoring

Focus Area Four

**Overall Goal**
Increase the use of monitoring to target interventions and reduce prescription drug misuse

**Metrics**

- Number of providers registered with the Montana Prescription Drug Registry (MPDR)  
  *Source* | Montana Board of Pharmacy  
  *Current* | 3,898 - September 2017 | *Goal* | Increase

- Number of monthly searches entered into the MPDR  
  *Source* | Montana Board of Pharmacy  
  *Current* | 26,274 - August 2017 | *Goal* | Increase

- Number and capacity of academic detailing programs  
  *Source* | Montana Medicaid and Montana Veterans Affairs  
  *Current* | 2 | *Goal* | Increase

**Key Area for Action #1**
Increase MPDR functionality and use

**Strategies & Leads**

- Support administrative and legislative policies mandating MPDR use  
  *Lead* | DPHHS

- Encourage internal healthcare facility peer-to-peer review of MPDR use.  
  *Lead* | Montana Board of Pharmacy

- Support efforts to integrate MPDR information into provider software for EHRs and pharmacy operating systems  
  *Lead* | Montana Board of Pharmacy and Veterans Affairs
Increase physician, health professional and pharmacist education on the proper prescribing guidelines and the use of the MPDR

**Lead |** Montana Medical Association, EMS, AAP, AFP, Pharmacies, Montana Healthcare Foundation

Facilitate access to de-identified MPDR data for analysis

**Lead |** Montana Board of Pharmacy

Create partnerships with stakeholders by providing de-identified PDR reports to help partners better address substance misuse and abuse issues

**Lead |** DPHHS DDPI

Use MPDR and other health system data to inform provider education and outreach, including academic detailing

Use monitoring system data to target education and outreach programs to communities

**Lead |** DPHHS DDPI

Support academic detailing efforts that utilize monitoring data to target education to providers

**Lead |** Veterans Affairs and Montana Medicaid
Treatment

Focus Area Five

**Overall Goal**
Expanded access to evidence-based, recovery oriented, culturally appropriate treatment for all Montanans

**Metrics**

- Number of adult and youth client admissions annually to state approved substance use treatment providers
  
  **Source**: Montana Medicaid and SAMS
  
  **Current**: 5,801 (2015)  
  **Goal**: Monitor

- Number of provider buprenorphine waivers
  
  **Source**: SAMHSA
  
  **Current**: 38  
  **Goal**: Increase

- Number of state approved providers and DOC run or contracted facilities that offer MAT
  
  **Source**: DOC and DPHHS CD Bureau
  
  **Current**: 49  
  **Goal**: Increase

- Number of Licensed Addiction Counselors
  
  **Source**: Montana Board of Behavioral Health
  
  **Current**: 793  
  **Goal**: Increase

- Number of SBIRT screenings
  
  **Source**: Unknown
  
  **Current**: Unknown  
  **Goal**: Increase

- Neonatal abstinence rate per 1,000 births annually
  
  **Source**: Hospital discharge data system
  
  **Current**: 8.5  
  **Goal**: Decrease cases not resulting from MAT

**Key Area for Action #1**

Increase Montana’s capacity to serve and treat people with substance use disorder using best practices

- Train and increase number of LACs and dually licensed mental health and substance use providers and peer supporters
  
  **Lead**: State and tribal colleges, DPHHS, licensure boards

- Continue SUD treatment funding through maintaining Medicaid expansion through the HELP Act
  
  **Lead**: DPHHS, SUD Task Force, local advocates
Increase number of state approved SUD providers who can access Medicaid reimbursement, including supporting tribally operated clinics and Urban Indian Health Clinics to become state approved.

**Lead | DPHHS Chemical Dependency and Quality Assurance Bureaus**

Increase capacity of existing state approved and other providers to serve a greater number of Montanans across the continuum of care using evidence based practices.

**Lead | DPHHS Chemical Dependency Bureau**

**Key Area for Action #2**

Increase number of primary care practices that offer SUD and co-occurring services in an integrated setting.

Support healthcare providers to integrate primary care, substance use and mental health services in one clinical location to best assess and serve patients with SUD and co-occurring mental health concerns.

**Lead | Montana Healthcare Foundation**

Increase the number of providers implementing SBIRT (Screening, Brief Intervention and Referral to Treatment).

**Lead | Montana Healthcare Foundation and Montana Primary Care Association**
Key Area for Action #3

Increase access to Medication Assisted Treatment

- Develop a Hub and Spoke Model for comprehensive MAT care and education in Montana
  Lead | DPHHS Chemical Dependency Bureau

- Increase the number of MAT providers and physicians with buprenorphine waivers
  Lead | DPHHS Chemical Dependency Bureau, local providers

- Provide education on MAT to providers, pharmacies, and families
  Lead | DPHHS Chemical Dependency Bureau

- Support access to MAT services at the Montana Chemical Dependency Center
  Lead | DPHHS Chemical Dependency Bureau and MCDC

Key Area for Action #4

Strengthen the continuum of holistic SUD care in communities across Montana

- Foster collaboration, including between frontier and rural areas and larger urban centers, to improve the continuum of care in communities
  Lead | DPHHS Chemical Dependency Bureau, local providers

- Increase access to SUD treatment through technology and other means
  Lead | DPHHS Chemical Dependency Bureau, local providers

- Strengthen and integrate systems of care
  Lead | DPHHS Chemical Dependency Bureau, local providers

- Ensure that Montana’s reimbursement system for SUD treatment supports the full continuum of care
  Lead | DPHHS Chemical Dependency Bureau, Medicaid, insurers

- Support the Montana Healthcare Foundation’s “Solving Perinatal Drug and Alcohol Use Initiative” and other efforts to increase access to treatment for pregnant women with SUD
  Lead | Montana Healthcare Foundation and local providers
Family and Community Resources

**Focus Area Six**

**Overall Goal**
Expand access to supportive resources for individuals and families affected by SUD, including those in recovery

**Metrics**

- **Number of licensed peer mentors**
  
  *Source: Licensing Board*
  
  **Current:** 0  
  **Goal:** Increase

- **Percent of Child and Family Services Division out-of-home placements with parental substance use indicated**
  
  *Source: DPHHS Child and Family Services Division*
  
  **Current:** 65% (April 2016)  
  **Goal:** Decrease

- **Number of naloxone trainings annually**
  
  *Source: DPHHS DDPI and STR Grant*
  
  **Current:** 0  
  **Goal:** Increase

- **Number of needle exchange and harm reduction programs**
  
  *Source: Open Aid Alliance*
  
  **Current:** 2  
  **Goal:** Increase
Key Area for Action #1

Increase access to and training on naloxone

Strategies & Leads

- Provide blended online/in-person “train the trainer” and provider trainings on the recognition of opioid overdose and naloxone use to EMS, fire, law enforcement, school nurses and other sectors in all Montana counties
  
  **Lead |** DPHHS DDPI and STR Grant

- Distribute naloxone to trained first responder groups
  
  **Lead |** DPHHS STR Grant

- Encourage co-prescribing of naloxone at the time of a high dose opioid prescription
  
  **Lead |** DPHHS DDPI and STR Grant

- Track naloxone use statewide
  
  **Lead |** DPHHS DDPI

Key Area for Action #2

Increase access to peer mentors, housing and other evidence based recovery supports

Strategies & Leads

- Finalize process for credentialing peer mentors in Montana and provide reimbursement for peer mentors through the Substance Use Prevention and Treatment Block Grant
  
  **Lead |** Department of Labor and Industry

- Increase the number of certified peer supporters
  
  **Lead |** DPHHS Chemical Dependency Bureau, Montana Peer Support Network, Rocky Mountain Tribal Leaders Council

- Develop multidisciplinary teams to address child safety and substance use in child protection service cases
  
  **Lead |** DPHHS Child and Family Services Division
Key Area for Action #3

Strategies & Leads continued

- Increase the number of SUD programs with peer supporters on staff
  Lead | DPHHS Chemical Dependency Bureau, local providers

- Support peer mentoring organizations as they develop and seek to recruit and appropriately match peers with individuals in recovery
  Lead | DPHHS

- Support development of additional housing supports for individuals in recovery and leaving protective custody
  Lead | DPHHS and DOC

Increase access to needle exchange programs and other harm reduction initiatives

- Support the development of additional needle exchange and other harm reduction initiatives in Montana communities
  Lead | Open Aid Alliance

- Provide on-going, statewide capacity building and technical assistance for harm reduction programs utilizing resources from the National Harm Reduction Coalition
  Lead | Open Aid Alliance

- Develop a Montana Harm Reduction Summit
  Lead | Open Aid Alliance
Reduce the stigma associated with SUD and mental health and increase input from people with lived SUD experience into state programs and planning processes

- Invite peer mentors and drug courts graduates to future task force meetings
  
  **Lead | DPHHS DPPI, active users and affected family members**

- Support mental health, substance use, harm reduction and trauma informed training for justice system staff and first responders
  
  **Lead | CIT Montana and ChildWise Institute**

- Support a Safe Harbor Policy for women to access prenatal and SUD services without fear of criminal repercussions
  
  **Lead | DPHHS**

- Add language to paraphernalia amendment to increase needle disposal and increase access to sharps disposal boxes to protect users and the public
  
  **Lead | Open Aid Alliance**

- Support messaging across sectors that SUD is a treatable, chronic disease
  
  **Lead | Substance Use Strategic Planning Task Force**

### Page 9 || Substance Use in Montana

- 20% of high school students report marijuana use in the last month.

- 122K estimated number of Montanans aged 12+ using marijuana in the last year

- 3% of Montanans aged 12+ (18,000 people) are dependent on or abusing illicit drugs
- 5% of young adults aged 18-25 report using cocaine in the last year. Less than 1% report heroin use
- 7% of Montanans aged 12+ had an alcohol use disorder in the last year

- An estimated 64,000 Montanans have a substance use disorder

- 90% of Montanans with Substance Use Disorder are not receiving treatment
- Montana youth and adults are more likely to binge drink or drink chronically than people in the US as a whole
- 390 alcohol attributable deaths in Montana annually

- 34% of all traffic fatalities in Montana are attributable to alcohol
- 427% increase in meth violations from 2010-2015
- 57% of all drug violations are for marijuana

Page 10 || Opioid Use in Montana
Montana Office of Epidemiology and Scientific Support
• 44% of all drug overdose deaths are attributable to opioids
• The rate of overdose deaths in Montana peaked in 2008-2009
• Montana opioid overdose rate was 4.2 per 100,000 residents in 2014-2015
• Since the year 2000, more than 700 Montanans have died from opioid overdose

• Montana has 70 opioid prescriptions for every 100 residents

• The number of Montana adults reporting non-medical use of pain relievers in the last year is decreasing
• One in seven high school students has taken prescription drugs without a doctor’s prescription

Basic Work Plan Narrative: Description of Work in Years 2-3

The goal of this evaluation is to determine the effectiveness and efficiency of activities coordinated and lead by the Montana Injury Prevention Program (MIPP) in preventing prescription drug abuse and reducing overdose morbidity and mortality. By engaging stakeholders in the development of a strategic plan and allowing for real-time data collection and analysis by enhancing syndromic surveillance efforts, this evaluation aims to enhance comprehensive community and health system interventions in areas determined to have high burdens of drug overdose morbidity and mortality. The results will be used to assess execution of these activities to guide future development of the program, including establishing best-practices for the expansion and continuation of interventions throughout the state. In addition, the evaluation will demonstrate the impact of program activities on specified outcomes, provide justification for the investment of funders and the public.

Stakeholders representing over 80 diverse organizations have convened several times in the past year to coordinate existing and ongoing activities involving opioid drug use, as well as develop a state-wide Prescription Drug Overdose (PDO) Prevention strategic plan. This plan has identified areas of focus, SMART objectives, created goals, and identified organizations and stakeholders responsible for completing tasks. Proposed program expansion will allow for a continuation of these meetings facilitated with the help of a PDO Planning Consultant, who will monitor the ongoing status of the strategic plan and the extent to which coordination of existing and ongoing activities have been successfully implemented.

Statewide data has been accessed and utilized to generate preliminary maps visualizing areas of high prescription drug overdose mortality. This allows for identification of communities at greatest need of targeted interventions. Plans for accessing and utilizing syndromic surveillance to create real-time analysis would benefit from this program expansion, and would allow for faster detection and response to any changing trends. Users of expansion funds include the purchase of Image Trend Continuum software to allow real-time EMS data tracking of opioid overdoses and naloxone use. Additionally, the expansion funds will be used to hire an epidemiologist/evaluator at .25 FTE who will be responsible for maintaining the updated statewide injury surveillance system for the MIPP, as well as working with epidemiologists from the Office of Epidemiology and Scientific Support. By improving syndromic surveillance and focusing on real-time data capture and analysis, MIPP will be more responsive to any changing needs of Montana communities.
Addressing Substance Use Disorder in Montana | 2017

“Funding for this strategic plan was made possible (in part) by the Centers for Disease Control and Prevention. The views expressed in written conference materials or publications and by speakers and moderators do not necessarily reflect the official policies of the Department of Health and Human Services, nor does the mention of trade names, commercial practices, or organizations imply endorsement by the U.S. Government.”
