

Care/Case Management Model Cover Sheet

Program Name: Comprehensive Primary Care Plus (CPC+)

Population Focus:

48 primary care practices throughout the state are enrolled CPC+ providers. Most members choose a primary care provider when enrolled in Medicaid and if they choose a provider who is a CPC+ provider they are enrolled in the program.

Program Objectives:

Comprehensive Primary Care Plus (CPC+) is an advanced primary care medical home model that rewards value and quality through innovative payments that support comprehensive care.

Program Description:

An initiative developed by CMS that transitions Medicare fee-for-service to value-based payments in collaboration with Medicaid and commercial payers in selected regions. Montana was *1 of only 14 regions* selected across the country to participate with Medicare in this exciting 5-year test demonstration that will support primary care in our state. Blue Cross Blue Shield of Montana, PacificSource, and Allegiance Life and Health have also partnered with Medicaid and Medicare in this model.

CPC+ payer partners and providers are collaborating around the goals of smarter healthcare spending, more effective healthcare delivery, and healthier patients.

The CPC+ advanced primary care medical home model is centered on five key functions:

- ▶ Access and Continuity;
- ▶ Care Management;
- ▶ Comprehensiveness and Coordination;
- ▶ Patient and Caregiver Engagement; and
- ▶ Planned Care and Population Health.

The program includes Track 1 and Track 2 practices; Track 2 practices have additional care delivery requirements so their payments are slightly higher. Track 2 practices also receive alternative FFS payments starting in 2019 that they are required to use for non-traditional face-to-face visits.

Required Care/Case Management Staff:

The team is determined by the primary care practice, it must be team based and patient centered. The teams usually consists of the primary care provider, a nurse, a social worker and in some cases a behavioral health specialist.

Program Demographics

There are currently 48 practices enrolled in CPC+ and approximately 62,000 Medicaid members including Medicaid expansion members. HMK members are also enrolled through BCBS's program.
