

ICD-10 Instructions:

When updating a diagnosis in the MCS and the existing diagnosis is an DSM-IV code, you must first REMOVE the primary diagnosis. After doing that, you can then search and find the ICD-10 codes. If you do not remove first, the old DSM-IV list will only be available and the update will not work. See instructions below.

If it is a new youth and new facesheet, only ICD-10 codes will be available.

Log into Youth

Click on Facesheet

Click edit, select remove (see below)

Note: This is a dummy record. I didn't have any dummy data with DSM-IV codes to demonstrate but but the instructions are the same.
