Overview: Effective April 1, 2020, use the following standards to determine Medicaid for Workers with Disabilities (MWD) income eligibility:

Individual: $2659.00
Couple: $3592.00

If an individual or couple’s countable monthly income is equal to or less than these standards in a benefit month, and if the worker with disabilities meets all other financial and non-financial criteria for the program, the worker with disabilities will qualify for the MWD program for that benefit month.

MWD benefits are issued after the Department receives and processes any cost share payment required. Cost share payments are based on the following fee schedule.

COST SHARE FEE SCHEDULE:

Medicaid benefits are issued to a qualifying worker with disabilities for any benefit month in which that worker is eligible for MWD and a cost share fee is paid to the Department. Cost share fees are based on the net countable income of the worker with disabilities. If a qualifying worker with disabilities is married to a person who is not also a qualifying worker with disabilities, only the worker with disabilities’ net countable income is used to determine the cost share fee. If both spouses are qualifying workers with disabilities, the fee is based on their combined net countable income.
