

The Montana Asthma Home Visiting Program

(MAP) Includes:

- Six home visits over a year
- Help identifying things in your home that may make your asthma worse
- Custom asthma education
- Educational resources and referrals to community services
- Individual help with managing the medical system
- Free allergen proof pillow and mattress covers
- Free air filter for those with animals or smokers present in the home
- **All asthma home visiting services are offered at no cost to the children and their families**

Who is eligible?

Any child aged 0-17 years with a current asthma diagnosis who has had either:

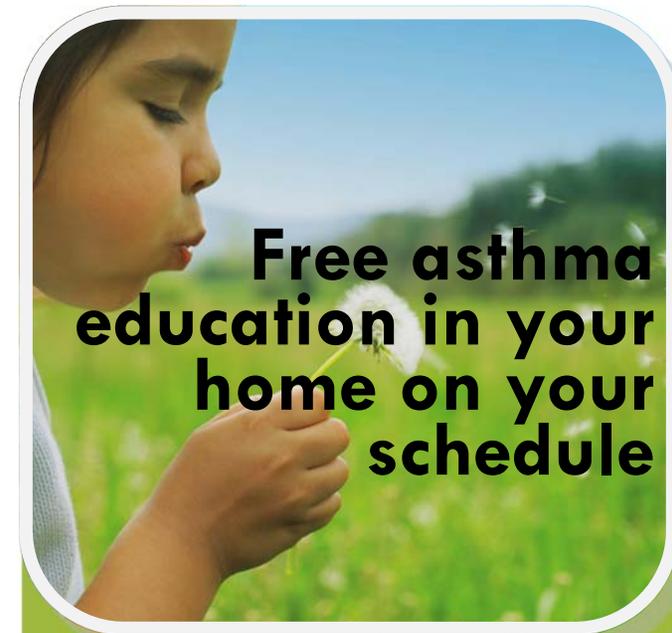

- an emergency department visit, hospitalization or unscheduled medical office visit for asthma
- OR
- an Asthma Control Test score of less than 20 in the last year.

500 copies of this public document were published at an estimated cost of \$0.00 per copy, for a total cost of \$000.00, which includes \$000.00 for printing and \$0.00 for distribution.

Experience dramatic results by participating in MAP

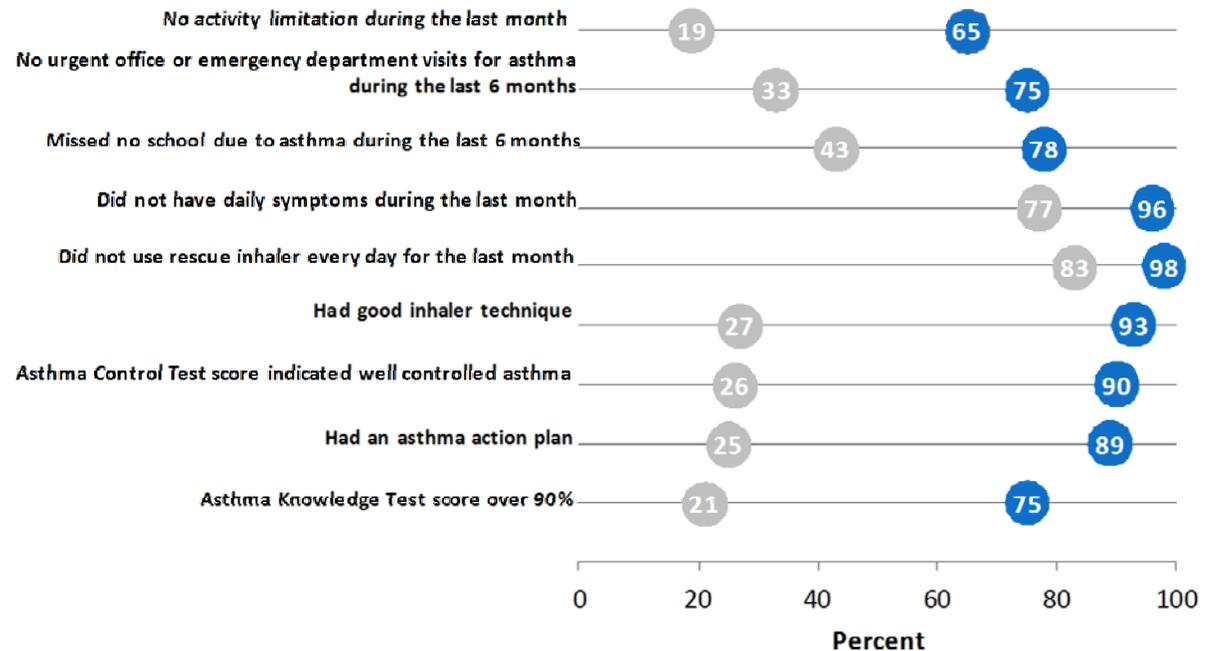

“Not only has my daughter’s health improved, **the whole family has benefited** from various environmental changes they made after an environmental home assessment.”

“It’s a blessing to be able to watch my daughter play the game she loves [soccer] while **not having to worry if she is on the brink of an asthma attack.**”

“She [home visiting nurse] was wonderful at explaining terminology to our son (and us) and shared many resources with us during our year with the Project. **This allowed us to be proactive about our son’s asthma** and we now feel confident in managing it.”

“With the support of my MAP nurse, **I was given information and encouragement** to work with my pediatrician to develop a plan for my son’s asthma, including starting him on a daily controller medication and working to figure out what in his home environment and outside environment was making his asthma worse.”

Results from before and after completing the asthma home visiting program

- * **Avoid missed school days**
- * **Limit the number of days with asthma symptoms**
- * **Learn how to properly use asthma medications**
- * **Create a plan to manage asthma**
