*Adults: 67%

Age Groups Evaluated: Children = 4 months to 5 years (two vaccines). Adolescents = 11 to 17 years (two vaccines). Adults = 19 years and older (one vaccine)

What is imMTrax?

Montana’s Immunization Information System (imMTrax) is a confidential, computerized database that stores immunization records for Montanans of all ages. imMTrax combines records from multiple immunization providers to form one shot record.

14 Million
Immunizations Added Since 2013!
