Pet Preparedness

September is National Preparedness Month. Planning what to do before a disaster strikes is the best protection for you and your family. Addressing the need of family pets in emergency plans will help you respond to an emergency. These simple steps will help you prepare your pet if disaster strikes.

Before a Disaster

Not all shelters will allow pets

Plan ahead by contacting your local emergency manager to see if you will be allowed to evacuate with your pets to designated shelters.

Plan for when you're not home

Make arrangements in advance for someone you trust to take your pet if you are away during a disaster or evacuation.

Make arrangements with friends or relatives

Ask people outside your immediate area if they would be able to shelter you and your pet – or just your pet – if necessary.

Assemble an emergency kit for your pet

Prepare a kit for your pet(s) so evacuations or sheltering in place go smoothly.

Pet Emergency Kit

If a disaster strikes, you may not have access to food, water or electricity for several days. Preparing an emergency kit for your family, which includes your pets, is an important step in keeping everyone safe and healthy during a disaster.

Leash, Collar or Harness with ID Tags and License attached

Recent Picture of you and your pet together

Medications and Medical Records (to include rabies and other shot records)

Crate or Pet Carrier

Food and Water (5 days for each animal), bowls, manual can opener (if your animals eat wet food)

Plastic bags/litter for cleaning up after your pet

Familiar items: favorite Toys, Treats, and Bedding

Pet First Aid Kit

During a Disaster

If you shelter in place, do it safely. Identify a safe area of your home where you can all stay together.

Separate Dogs and Cats as stress may affect behavior

Close off or eliminate unsafe nooks and crannies where frightened cats may try to hide.

Have extra newspapers for sanitary reasons

Rules if you evacuate:

Rule 1:

If it isn't safe for you, it is not safe for your pets. Pets left behind in a disaster can easily be injured, lost or killed. Make plans for ALL pets during natural disasters.

Rule 2:

Evacuate early. Don't wait for mandatory evacuation orders. Evacuating before conditions become severe will keep everyone safer and the process less stressful.
