

# Opioid Use in Montana

	United States	Montana
Opioid drug overdose death rate (age-adjusted per 100,000 people) <sup>1</sup>	<b>10.2</b> 2016	<b>2.3</b> 2017
Opioid prescriptions filled per 100 people <sup>2</sup>	<b>59</b> 2017	<b>61</b> 2017
Percent of high school students who reported having ever taken a prescription pain medicine that was not prescribed to them, or used it differently than how it was prescribed <sup>3</sup>	<b>14%</b> 2017	<b>14%</b> 2017

## Key Points:

- From 2015 to 2017, 345 Montanans died from a drug overdose. 86 of these drug overdose deaths (25%) were due to opioids.<sup>1</sup>
- Unlike national trends, Montana's death rate for opioid overdose has declined since peaking in 2009, from a rate of 9.0 deaths per 100,000 people to 2.3 in 2017.<sup>1</sup>
- 43,000 Montanans aged 12 years and older were estimated to misuse opioid medication in 2015-2016.<sup>4</sup>
- \$5 million was charged by Montana hospitals for opioid related hospitalizations and emergency department visits in 2017.<sup>5</sup>
