

# What is imMTrax?

Montana's Immunization Information System (*imMTrax*) is a confidential, computerized database that stores immunization records for Montanans of all ages. *imMTrax* combines records from multiple immunization providers to form **one shot record**.

*imMTrax* helps healthcare providers make sure Montana's kids, teens, and adults are protected from serious diseases.

*imMTrax* is provided by the Montana Department of Public Health and Human Services.

## How can imMTrax help my family?

### Preserve Your Family's Shot Records

Children, teens, and adults receive several shots over the course of their lives to prevent serious diseases. *imMTrax* keeps their immunization history in one record, even if your family moves or changes healthcare providers.

Once entered into *imMTrax*, the record will be available when needed for future:

- ✓ Childcare and School Entry
- ✓ College Admission
- ✓ Employment
- ✓ Travel

### Improve Medical Care

*imMTrax* combines records from multiple immunization providers to form one shot record. Having one *imMTrax* record allows your healthcare provider to make sure your family is up-to-date with their shots.

### Participating in *imMTrax*

Many healthcare providers in Montana participate in *imMTrax*. Ask your provider to be sure.

Montana law says that consent must be given to be included in *imMTrax*. Consent can be withdrawn at any time.

## Is imMTrax Secure?

**Yes.** *imMTrax* is only used by approved health professionals, public health departments, and school personnel for authorized purposes.

*imMTrax* has several layers of protection to keep all immunization records safe and secure.

*imMTrax* is compliant with the Health Insurance Portability and Accountability Act of 1996 (HIPAA).
