

Smoking, House Fires, and EMS Script

Older Man: When I fell asleep with a cigarette in my hand, my house caught fire...and my neighbor called 911. The sirens woke me up... and the firefighters pulled me out...and the EMS folks did the rest. I never thought about my life depending on a group of volunteers. This is a big state, but they got here, and they got me to a hospital. Heroes, every last one of them... and I owe them my life.
