

## **Rodeo and Chewing Tobacco Script**

**Heath:**

Bareback riding takes a special kind of person.

It takes somebody that's willing to deal with all odds against them.

It's the most physically demanding event in rodeo.

There are a lot of guys that chew tobacco, and I've seen my friends have the start of cancer in their lip, and they change it from top to bottom rather than quitting.

And I've run across guys that have to push a button to speak to me because they've gotten throat cancer.

And it takes a special person to ride a bucking horse, and if you can do that, then you can kick the habit of chewing.

In rodeo, you never back down from a challenge.

So I challenge you- quit chewing today.
