

Tobacco 21

Dr. Henyon: People are talking about Tobacco 21.

Why? Because it raises the age to buy tobacco products to 21...

...and that's a good thing because 90% of people addicted to nicotine started young.

Making tobacco harder to get reduces the chance of lifelong addiction.

Why do I care so much? I'm Dr. Pepper Henyon, a pediatrician here in Montana.

Tobacco 21 is designed to protect the health of our next generation.
