

5.2 PAP TEST REPORT

Policy: The Pap Test Report provides information on the cervical screening activities that are performed in Title X clinics. This data is collected by FPP for submission in the Family Planning Annual Report (FPAR). The report includes the number of Pap tests performed (not persons referred) with atypical squamous cells (ASC) or higher result, and the number of Pap test with high-grade squamous intraepithelial lesions (HSIL) or higher, result for Title X clients in a calendar year (January – December).

Procedure:

1. All Title X clinics must complete and submit to the Pap Test Report to FPP by January 20th of each year. It is the responsibility of sub-recipient clinics to ensure that the data is submitted for all of their satellites by the due date.
2. The number of Pap tests should include conventional and thin prep Pap tests. This does not include results of benign cellular changes, inflammation or reactive reparative results.

The report is as follows:

PAP TESTS PERFORMED
Yearly report

Clinic Name:	
Submitted by (Name):	
Reporting Period:	January 1 st – December 31 st of each year

Please report the number of **Pap tests performed (not persons referred)** that had Pap results of ASC or higher. The number should include conventional and thin prep Pap tests. This does not include results of benign cellular changes, inflammation or reactive reparative results.

This number can be obtained from your December Pap test laboratory summary report.

Screening Activity	Number of Tests
Number of Pap tests with an ASC or higher result	
Number of Pap tests with an HSIL or higher result	

- **Number of Pap tests with an ASC or higher result:** ASC or higher results include ASC-US; ASC-H; LSIL; HSIL; squamous cell carcinoma; AGC; AGC, favor neoplastic; endocervical AIS; adenocarcinoma; or other malignant neoplasms
- **Number of Pap tests with an HSIL or higher result:** HSIL or higher results include HSIL; squamous cell carcinoma; AGC; AGC, favor neoplastic; endocervical AIS; adenocarcinoma; or other malignant neoplasms
- The number of Pap tests with an ASC or higher result **will include** the tests reported in the number of Pap tests with an HSIL or higher result because tests with a result of HSIL or higher are also tests with a result of ASC or higher
*The number of tests reported in Row 2 (Number of Pap tests with an ASC or higher result) is a subset of the number of tests reported in Row 1 (Number of Pap test with an HSIL or higher result).
