

# Montana Medicaid Tribal Consultation

## Tribal Residential Treatment Facility

November 6<sup>th</sup>, 2024

DEPARTMENT OF  
**PUBLIC HEALTH &  
HUMAN SERVICES**

# Purpose

- Establish the necessary Medicaid State Plan Authority.
- Develop a reimbursement rate methodology.

# Discussion

- Who is currently or will be the population served?
- What types of treatment services will be provided?
- ASAM levels of care and requirements for each level.

# Reimbursement Methodology

- Looking at the cost reports from Crystal Creek Lodge, the Department would look to establish the rate for a ASAM 3.5 residential treatment center.
- Taking the percentage difference in reimbursement from BHDDD, apply that to the 3.5 rate to establish a two-year interim reimbursement rate for new providers and then cost settle.
- Discussion around inflation factor methodology.

# Example

- For the provider rate study that was conducted for BHDDD, there was a 15.76% increase in the per diem from 3.5 to 3.7 level of care.
- Tribal Residential Treatment rate for 3.5 is set at a \$700.00 per day per diem, the interim reimbursement rate for a 3.7 could be calculated with the 15.76% increase.
  - $700 \times 15.76\% = \$810.32$  per day per diem.
- After two years the department would cost settle to determine the facilities actual costs.

Any other areas for discussion?

Thank you for today's discussion and participation.
