BHDD HB 936 DATA COLLECTION OVERVIEW

As part of the Department's continued Behavioral Health System for Future Generations (BHSFG) work, HB 936 Section 3 describes data reporting requirements for Comprehensive School and Community Treatment (CSCT). CSCT is a component of the Behavioral Health and Developmental Disabilities (BHDD) Children's Mental Health Bureau's (CMHB) continuum of care for youth with a serious emotional disturbance (SED) diagnosis.

Section 3. Reporting -- comprehensive school and community treatment services to children. The department of public health and human services shall develop and report patient-centered health outcome measures and total costs for each program and for each child for comprehensive school and community treatment services to children. The report shall be provided on a quarterly basis to the health and human services interim budget committee and the children, families, health, and human services interim committee.

CSCT is a comprehensive, planned course of community mental health outpatient treatment that includes therapeutic interventions and supportive services delivered in a public school-based setting, specifically within a school-provided office and treatment space. Services are focused on improving the youth's functional level by facilitating the development of skills related to exhibiting appropriate behaviors in the school and community settings. These youth typically require support through cueing or modeling of appropriate behavioral and life skills to utilize and apply learned skills in normalized settings. CSCT services include individual, group, and family therapy as well as skill-building and integration activities.

DATA SHARING PARTNERS

COORDINATION WITH OTHER STATE AGENCIES

To strengthen data collection and reporting, CMHB is collaborating with several state agencies to augment the data the bureau currently collects. CMHB will continue to leverage the multiple data sources available to it until the MOUs and data-sharing agreements are in place.
