

ATTACHMENT F

In Montana, schools are classified into Classes AA, A, B, and C based on the number of students enrolled in the school. The service fees outlined below are based on the class of the school. The smaller schools are provided higher fees based on lower number of available students for the program, higher travel expenses, and higher costs to access resources.

Each student can receive up to 5 services every quarter depending on which services they requested on their Student Request Form. A student can be involved in multiple activities for a service, but the specific Pre-ETS service can only be billed once each quarter. The quarterly report will document the specific Pre-Employment Transition Services received by each student during the quarter. The maximum amount that a high school can submit a quarterly report and invoice for each quarter is \$18,000.

Services in a Class AA School

Quarterly Fee for each service per student \$50 per service

Services in a Class A School

Quarterly Fee for each service per student \$75 per service

Services in a Class B School

Quarterly Fee for each service per student \$100 per service

Services in a Class C School

Quarterly Fee for each service per student \$125 per service
