

FRIDGE TEMPERATURE LOG

Facility Name: _____ Fridge Location: _____

- ◆ Store the thermometer in the same place for all staff to easily locate it.
(i.e. place it in a door shelf, or tie one end of a red ribbon to the thermometer and the other to the freezer door handle)
- ◆ The freezer temperature must be 0°F or below.

Month/Year: _____

If temperature is above 0°F, use Action/Comment column to indicate corrective steps.

1. Record the temperature on the log.
2. Wait ~15 minutes and re-check the temperature of the freezer.
 - After 15 minutes, if you notice the temperature is back to normal, record it on the log.
 - After 15 minutes, if you notice that the temp is still unacceptable, remove all the items from the freezer and record on the log under “action/comment” that all items were removed.
