

THERMOMETER CALIBRATION LOG

Facility Name:

Check calibration of thermometers daily and when accidentally dropped. Thermometers must be accurate to at least +/- 2°F from 32°F.

Procedure:

- Fill container with 50% crushed ice and 50% water (use 60% / 40% ratio for cubed ice and water).
- Place thermometer stem into ice water solution (sensor must be completely submerged).
- Read thermometer after 2 minutes.
- If thermometer does not read 32°F (+/- 2°F), adjust it accordingly.
- Complete appropriate columns below.

Month / Year: _____
