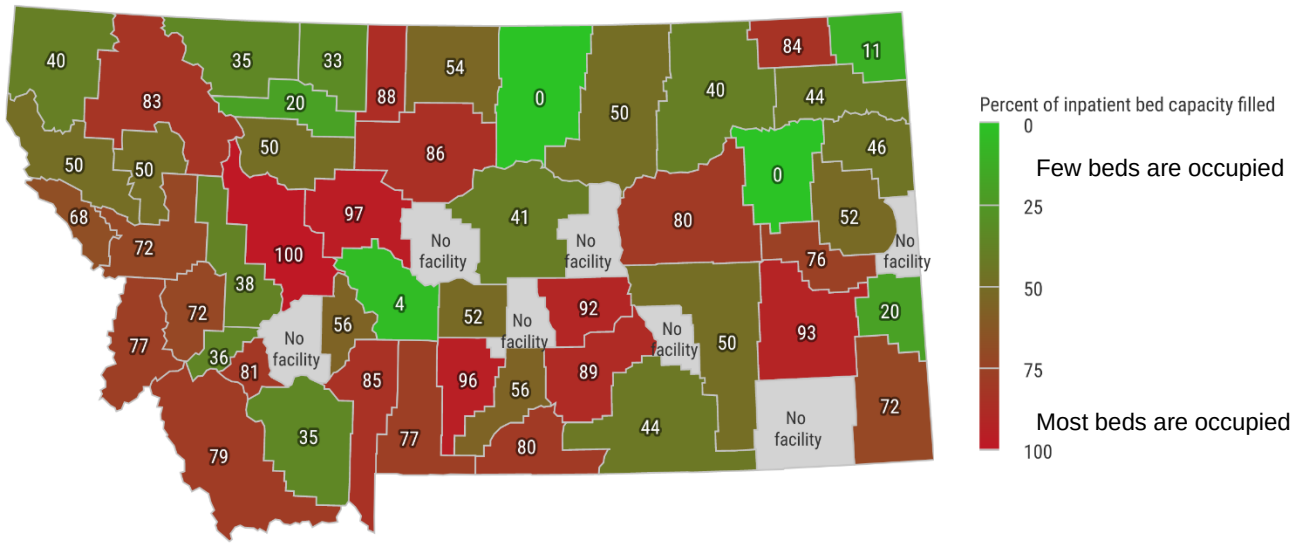
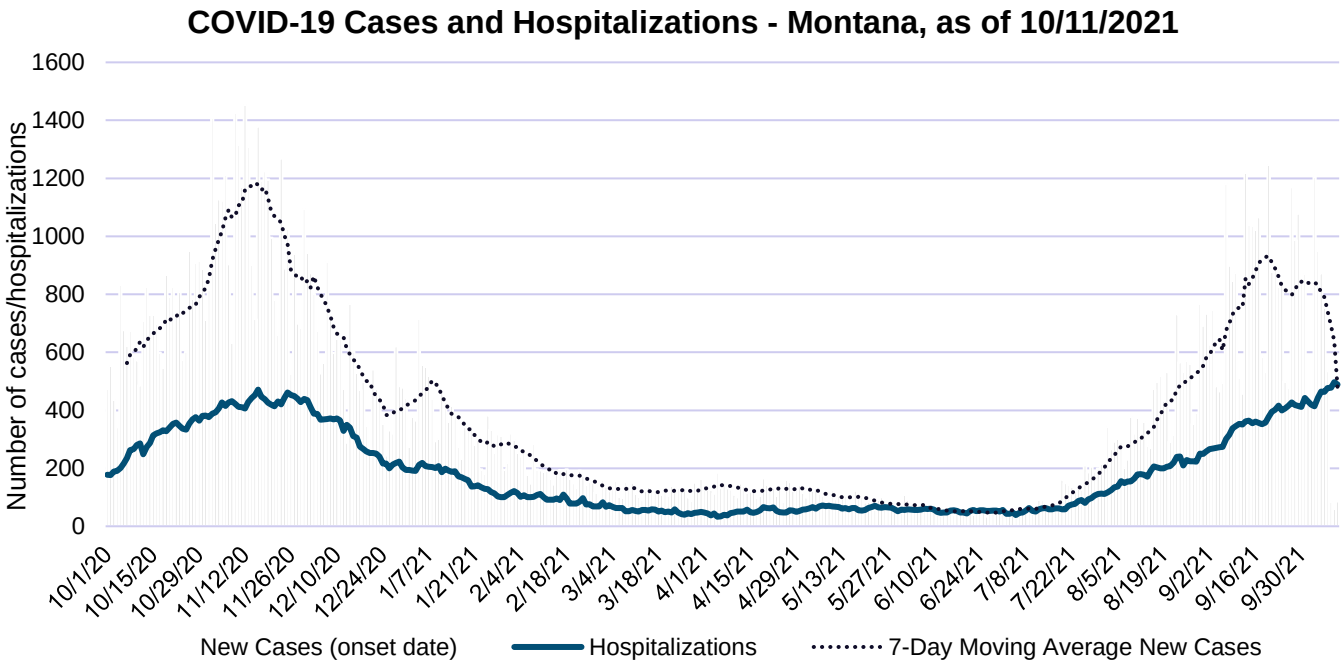
Bed capacity varies by region and indicates severity of strain on hospital beds as COVID-19 cases increase in different areas of the state. This map displays the percentage of inpatient beds occupied. Green shading indicates more beds are open, red shading indicates nearing capacity. A list of facilities by county can be found at the end of this report.



COVID-19 hospitalizations change over time. As reports of new COVID-19 cases increase, the demand on hospital beds increases as well. The changes over time illustrate occupancy in relation to past caseloads and hospital occupancy by COVID-19 patients. The figure represents the trend in hospitalizations (blue solid line) and daily new case reports over a 7-day moving average (grey dashed line).



Large Hospitals

Inpatient bed capacity and availability is listed below. Hospitals are listed by type, beginning with Prospective Payment System (PPS) hospitals, followed by specialty hospitals and Critical Access hospitals (CAH).
