COVID-19 Hospital Occupancy and Capacity in Montana

Status Report as of 10/12/2020
Statewide Snapshot

Beds, ICU, and ventilator availability are important factors to consider during the COVID-19 response. As cases require additional support, hospital resources respond to the increasing demand. Total availability and usage are depicted below, indicating the usage due to COVID-19.

Hospitals report data on beds, ICU and ventilator capacity daily, among other indicators of readiness and ability to respond to COVID-19 at their local facility. Data is updated throughout the day and summarized by the end of day. Data is subject to change during the day, as demand changes throughout the day.
