

# National Immunization Survey (NIS) 2017

Children age 19-35 months

The NIS is a random digit-dialing telephone survey followed by a mailed survey to childrens' immunization providers conducted by the Centers for Disease Control and Prevention. This survey collects data on vaccination status of children who are or will be 19-35 months during the survey year.

## 4:3:1:4:3:1:4 Coverage Rates<sup>1</sup>

2017 Montana Estimate

2017 U.S. Estimate

Healthy People 2020 Goal

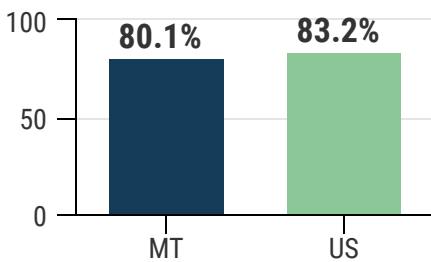

<sup>1</sup>The NIS measures a 7-vaccine series which include: 4 or more Diphtheria, tetanus & acellular pertusis (DTaP), 3 or more Polio, 1 or more Measles, mumps, rubella (MMR), 3 or 4 doses Haemophilus influenzae type b (Hib), 3 or more Hepatitis B, 1+ Varicella, and 4 or more Pneumococcal conjugate (PCV).

## Montana Compared to the US

The data below is from the 2017 National Immunization Survey.

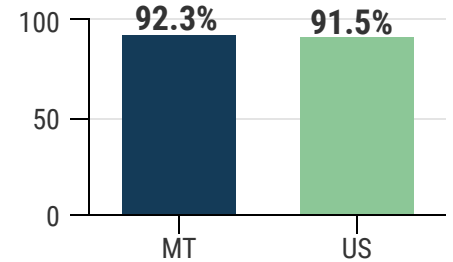

4+ DTaP

3+ Polio

1+ MMR

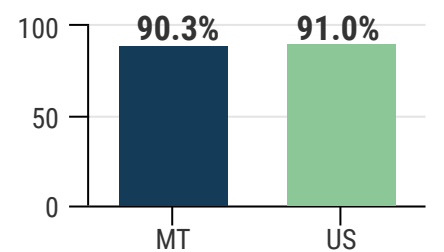

Hib

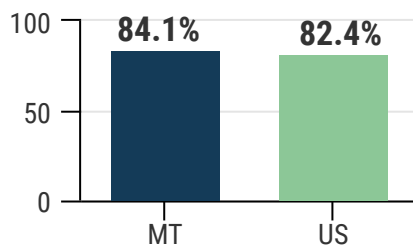

3+ Hep B

1+ Varicella

4+ PCV

Vaccination protects more than just the children!
