2021 Syphilis data show rising numbers, making prenatal care and appropriate maternal treatment critical.

- **4048 Cases of Chlamydia**: 1% decrease since 2020
- **1431 Cases of Gonorrhea**: 14% decrease since 2020
- **93 Primary & Secondary Cases of Syphilis**: 127% increase since 2020
- **9 Cases of Syphilis Among Ewborns**: 350% increase since 2020

Anyone who has sex could get an STD, but some groups are more affected:

- Young people aged 15-24
- Gay & bisexual men
- Pregnant people
- Racial & ethnic minority groups

Left untreated, STDs can cause:

- Increased risk of giving or getting HIV
- Long-term pelvic/abdominal pain
- Inability to get pregnant or pregnancy complications

Prevent the spread of STDs with three simple steps:

- Talk
- Test
- Treat
