

Medication Therapy Management, Years 2-5

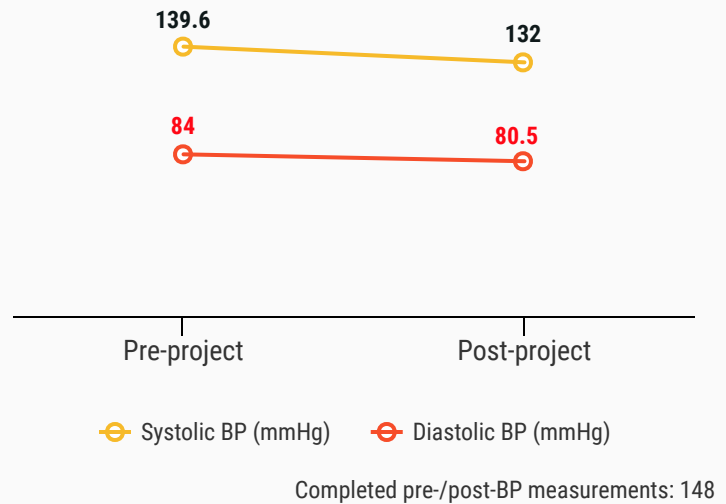

Project Objective: Clinics and pharmacists jointly work with selected patients to improve blood pressure (BP), cholesterol, A1C and medication adherence for patients on medication for those chronic conditions.

PARTICIPANTS: 7 Clinics and 8 Pharmacies

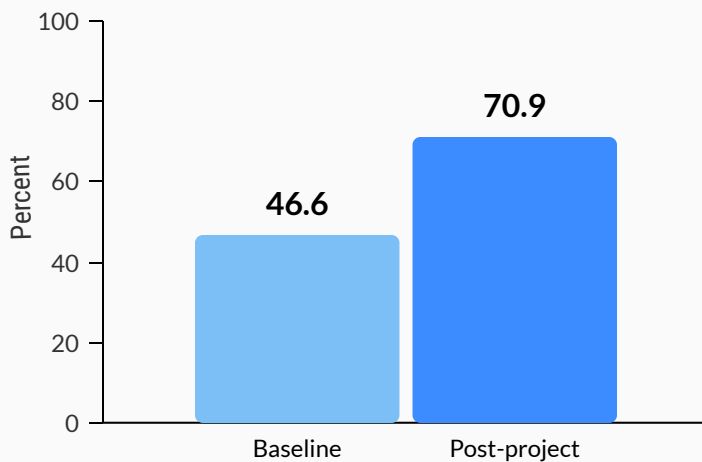

Topics of BP Consults

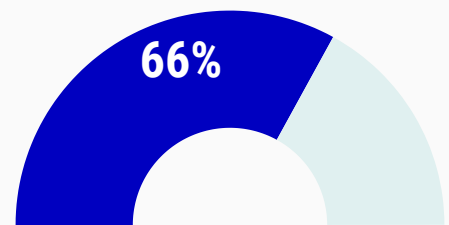

Aggregate Mean BP Measures

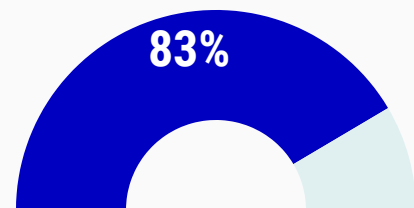

Changes in Clinical Measures

Blood Pressure < 140/90 mmHg

● Pre-project PDC >= 80%

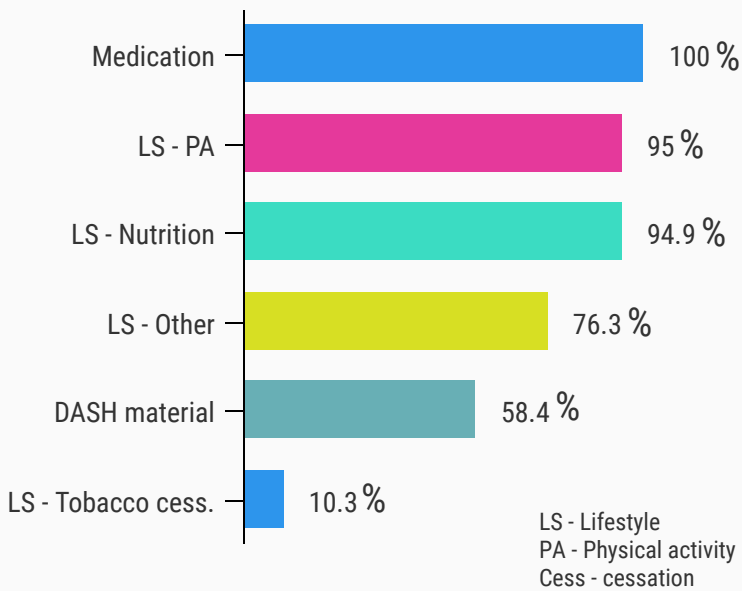

● Post-project PDC >= 80%

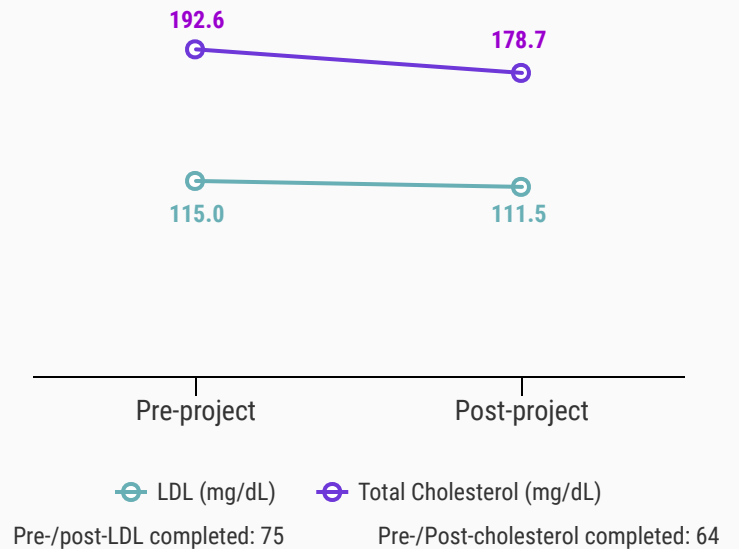

PDC-Proportion of Days Covered

Medication Therapy Management, Years 2-5, continued

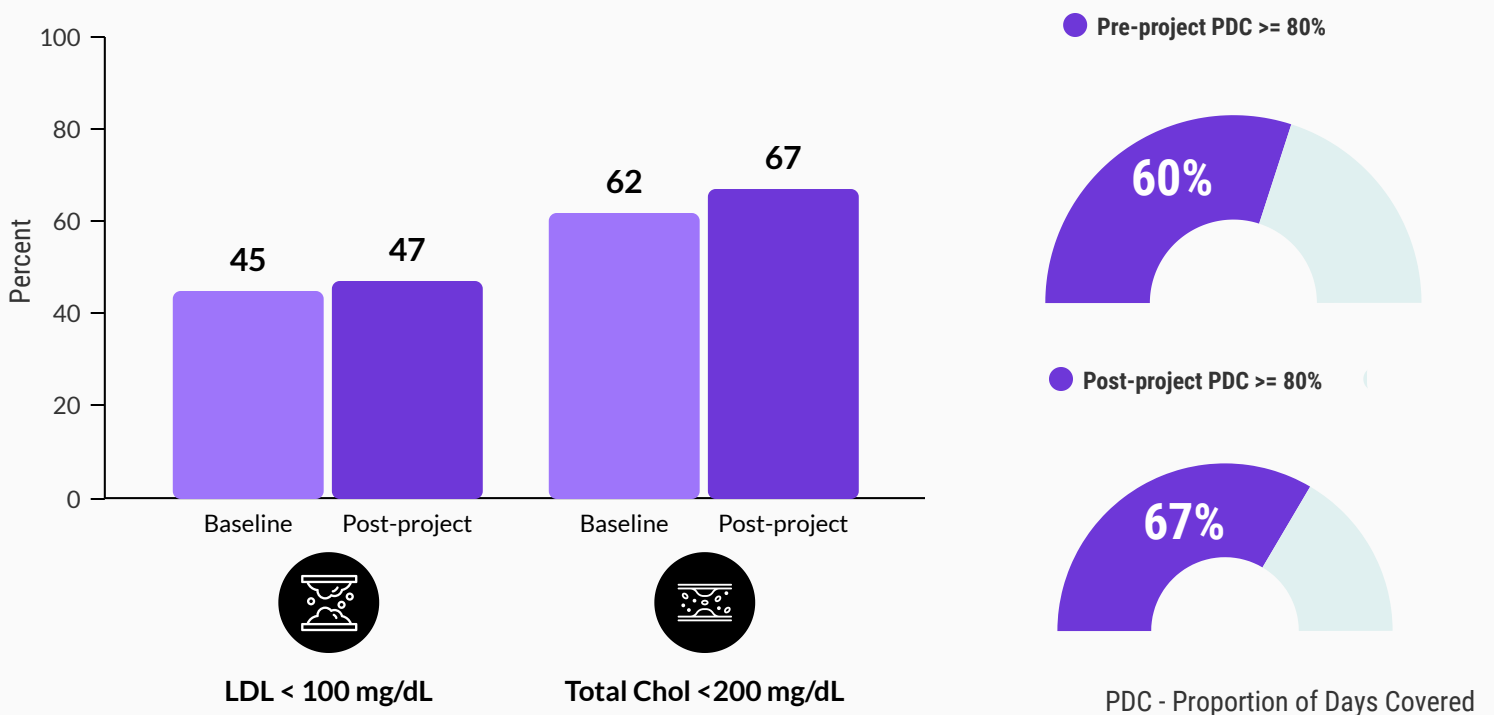

Topics of Lipid Consults

Aggregate Mean Lipid Measures

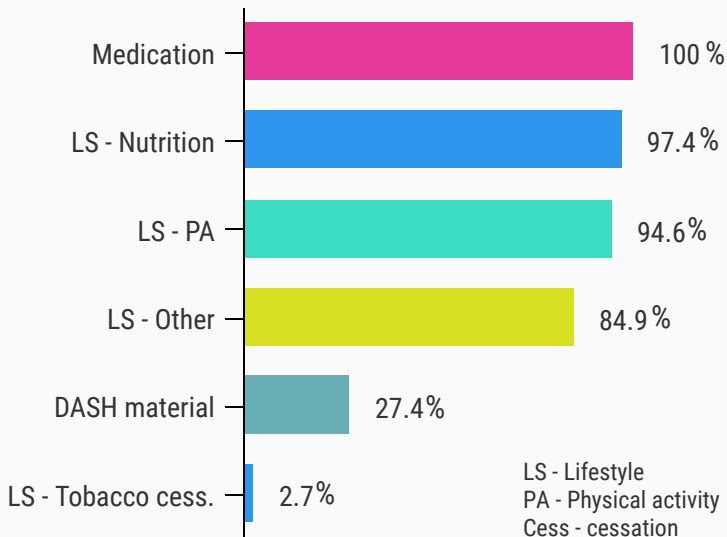

Changes in Clinical Measures

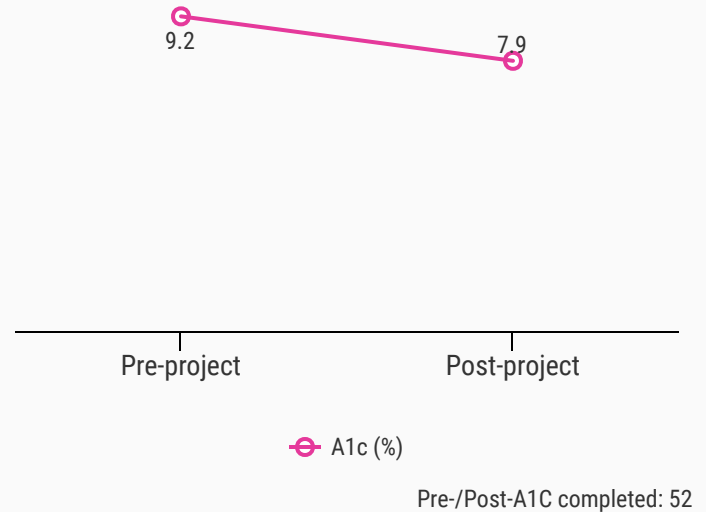

Medication Therapy Management, Years 2-5, continued

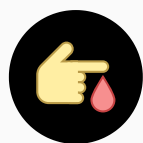

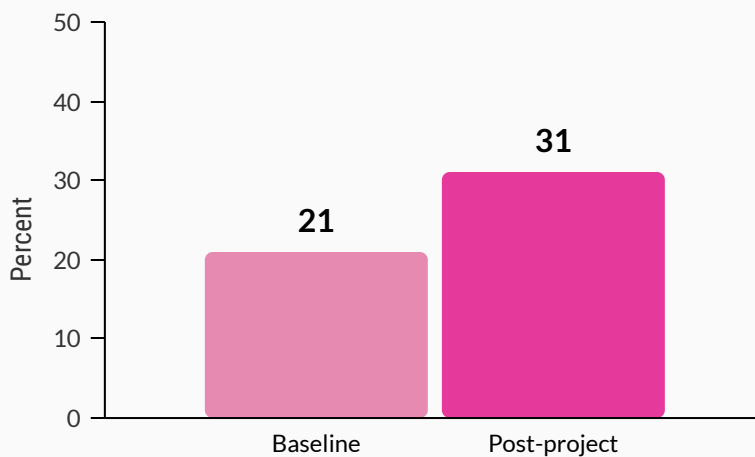

Topics of Diabetes Consults

Aggregate Mean A1c Measure

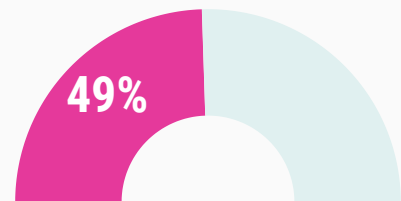

Changes in Clinical Measures

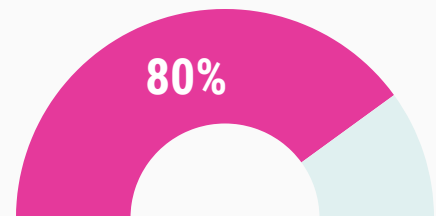

A1c < 6.5%

Pre-project PDC >= 80%

Post-project PDC >= 80%

PDC - Proportion of Days Covered
