INSTALLING THE iOS ELITE UTILITIES APP

Download the free app from the Apple App store on your iOS tablet. After downloading the app, use the iPad camera to scan patient driver's licenses and import that information into an incident.

Facts

- The iOS app must be installed on any iPad that uses the **camera** to scan driver's licenses.
- When scanning driver's licenses, you do not need to use the app. Once the app is on a device, users only need to click the ID scanning buttons to scan a driver's license. For more information, see .
- An internet connection is required to install the app.
- For additional information about the setup of ID scanners, see [ID Scanning Overview](#).

After Installing

- After installing the app, users **do not need** to use or access the app to scan IDs.

How to Install the Elite Utilities App for Scanning Driver's Licenses

 **NOTE:** You can also install the app directly from inside the incident form by selecting the *Driver's License 2D Camera Scanner* > *Install*.

1. On the iPad, open the App Store.
2. Search for "ImageTrend Elite Utilities."
3. Select *Get* to install the app.

 **NOTE:** After installing, the app's icon appears on the iPad's desktop.

Test Your Camera

Testing your camera requires an active incident form with the Driver's License 2D Camera Scanner button on the form template.

 **IMPORTANT!** Do not open the Utilities App to scan a license. Licenses are scanned by selecting the Driver's License 2D Camera Scanner button and following the prompts.

1. On the iPad with the iOS Elite Utilities app installed, open Elite Field.

 **NOTE:** Internet is not required to use the iPad camera for scanning driver's licenses.

2. Create or open an existing incident.
3. **Locate and click** the *Driver's License 2D Camera Scanner* button.
A new tab opens with a modal.
4. Select *Open*.
The iPad switches to the camera app.

5. **Center** the patient's driver's license in the middle of the screen, to scan the barcode. As soon as the app reads the barcode, you

are redirected to the incident.

6. Click **OK** to add the imported information to the incident.

A screenshot of a form titled "Driver's License Scan Results". The form contains various fields for personal information, including First Name, Middle Name, Last Name, Date of Birth, Gender, Address, City, State, Postal Code, Country, Weight (Lbs), Weight (Kgs), Driver's License Number, and Retire/Expired Driver's License. At the bottom, there are "OK" and "Cancel" buttons.
