MONTANA TRAUMA FACILITY DESIGNATION CRITERIA (2024)

Montana Department of Public Health and Human Services EMS and Trauma Systems Section

Note: Occasional variances from these standards may occur. These should be reviewed as part of the hospital's trauma performance improvement process.

The following table shows levels of trauma facility designation and their essential ("E") or desirable ("D") characteristics.

TRAUMA FACILITY CRITERIA	LEVELS				
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent) TRF = Trauma Receiving Facility (Level 5 equivalent)	CTC	RTC	ATH	СТН	TRF
INSTITUTIONAL & ADMINISTRATIVE COMMITMENT					
Facility		T	T	1	1
Demonstrated continuous institutional commitment/resolution by the hospital Board of Directors and Medical Staff within the last three years to maintain the human and physical resources to optimize trauma patient care provided at the facility.	Е	Е	Е	Е	Е
The trauma program has adequate administrative support and defined lines of authority that ensure comprehensive evaluation of all aspects of trauma care.	Е	Е	Е	Е	Е
Hospital administration must demonstrate support for the research program (i.e., research equipment, biostatistical support, salary support, etc.)	Е				
PROGRAM ORGANIZATION & GOVERNANCE					
Trauma Service					
A clinical service recognized in the medical staff structure that has the responsibility for the oversight of the care of the trauma patient. Specific delineation or credentialing of privileges for the medical staff on the Trauma Service must occur.	Е	Е	Е		
Must care for at least 1,200 trauma patients annually who meet National Trauma Data Standard (NTDS) inclusion criteria or 240 NTDS patients with an Injury Severity Score (ISS) greater than 15 per year.	Е				
Trauma Program					
There is an identifiable trauma program that has adequate administrative support and defined lines of authority that ensure comprehensive evaluation of all aspects of trauma care.	Е	Е	Е	Е	Е
Trauma Team					
A team of care providers to provide initial evaluation, resuscitation and treatment for all injured patients meeting trauma system triage criteria. The members of the team must be identified and have written roles and responsibilities.	Е	Е	Е	Е	Е
The trauma team is organized and directed by a general surgeon with demonstrated competence in trauma care who assumes responsibility for coordination of overall care of the trauma patient.	Е	Е	Е	D	
The trauma team is organized and directed by a physician with demonstrated competency in trauma care and is responsible for the overall provision of care for the trauma patient from resuscitation through discharge.				Е	

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent)					
RTC = Regional Trauma Center (Level 2 equivalent)					
ATH = Area Trauma Hospital (Level 3 equivalent)					
CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
The trauma team is organized and directed by a physician, physician					Е
assistant, or nurse practitioner with demonstrated competency in trauma care					
and is responsible for the overall provision of care for the trauma patient					
from resuscitation through discharge.					
There are clearly written criteria for trauma team activation that are	E	Е	Е	E	E
continuously evaluated by the multidisciplinary trauma committee.	Г	Г	Г		
Criteria for tiered activations must be clearly defined. Highest level of	Е	Е	Е		
activation must include:					
• Confirmed BP less than 90 mm Hg at any time in adults, and age-					
specific hypotension in children;					
 Gunshot wounds to the neck, chest, or abdomen GCS less than 9 (with mechanism of trauma); 					
 Receipt of transfer patients from another hospital who require 					
ongoing blood transfusion;					
 Patients intubated in the field and directly transported to the trauma 					
center;					
Patients who have respiratory compromise or need an emergent					
airway; and					
Receipt of transfer patients from another hospital with ongoing					
respiratory compromise (excludes patients intubated at another					
facility who are now stable from a respiratory standpoint).					
The general surgeon is expected to be present in the ED upon patient arrival	Е	Е			
for all patients meeting hospital specific criteria for the highest level of					
trauma team activation, given sufficient advance notification or within 15					
minutes of notification 80% of the time.					
Trauma response criteria for general surgeon activation will be specified.			Е		
The general surgeon is expected to be present in the ED upon patient arrival					
for those meeting criteria, if given sufficient advance notice or within 30					
minutes of notification 80% of the time					
The Community Trauma Facility must have a trauma team plan for when the				E	
general surgeon is available and a second schema for when the general					
surgeon is not available. When available to respond, the general surgeon is					
expected to be present in the ED upon patient arrival for those meeting					
criteria, if given sufficient advance notice or within 30 minutes of					
notification 80% of the time.					
Trauma Medical Director	Б	L	L	1	I
Board-certified or board eligible surgeon, credentialed to provide trauma	Е	Е	Е		
care, and participates on trauma call panel. Serve as the director of a single					
trauma program. Holds current ATLS certification. The trauma director has				1	
the authority to affect all aspects of trauma care including oversight of				1	
clinical trauma patient care, recommending trauma service privileges,				1	
development of clinical care guidelines, coordinating performance improvement, correcting deficiencies in trauma care, and verification of					
continuing trauma education.				1	
TMD is an ATLS instructor or course director.	Е	Е	D	-	
TIME IS All ATES INSURED OF COURSE UITCOOK.	L	L	ע	<u>I</u>	i J

TRAUMA FACILITY CRITERIA	LEVELS				
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent) TRF = Trauma Receiving Facility (Level 5 equivalent)	СТС	RTC	АТН	СТН	TRF
Physician board-certified or board eligible in a recognized specialty; with a special interest in trauma care who leads the multidisciplinary activities of the trauma program. The trauma director has the authority to affect all aspects of trauma care including oversight of clinical trauma patient care, development of clinical care guidelines, coordinating performance improvement, correcting deficiencies in trauma care, and verification of continuing trauma education.				E	
Physician, nurse practitioner, or physician assistant with a special interest in trauma care who leads the multidisciplinary activities of the trauma program. The trauma director should have the authority to affect all aspects of trauma care including oversight of clinical trauma patient care, development of clinical care guidelines, coordinating performance improvement, correcting deficiencies in trauma care, and verification of continuing trauma education.					Е
The trauma medical director must provide evidence of 36 hours in 3 years of verifiable external trauma-related CME and maintain successful completion of most recent edition of ATLS course.	E^2	E ²	E ²		
The trauma medical director must provide evidence of 36 hours in 3 years of verifiable external trauma-related CME or maintain successful completion of most recent edition of ATLS course.				E ²	E ²
TMD must attend 60% of all multidisciplinary trauma committee meetings. This obligation cannot be delegated.	Е	Е	Е	Е	Е
TMD must hold active membership in at least one national trauma organization and have attended at least one meeting during the last 3 years. (Membership in an ACS State COT is not equivalent to membership in a national organization)	Е				
TMD must hold active membership in at least one regional, state, or national trauma organization and have attended at least one meeting during the last 3 years.		Е	Е		
TMD must attend at least one state trauma meeting during the last 3 years (examples include Trauma Systems Conference, Rocky Mountain Rural Trauma Symposium, Rimrock Trauma Conference, Spring Fever Conference etc.)	Е	Е	Е	Е	Е
Trauma Coordinator/Trauma Program Manager					
A 1.0 full-time dedicated Registered Nurse or Advanced Practice Clinician working in concert with the trauma director, with responsibility for organization of services and systems necessary for a multidisciplinary approach to care for the injured. Assumes day-to-day responsibility for process and PI activities for any nursing and ancillary personnel involved in the care of trauma patients. Activities include completion of the on-line trauma coordinator course, clinical oversight, with periodic rounding on admitted trauma patients, provision of clinical trauma education and prevention, performance improvement, provision of feedback to referring facility trauma programs, supervision of the trauma registry, and development of policies. Must be involved in local, regional and the state	Е	Е	Е		

TRAUMA FACILITY CRITERIA	LEVELS				
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent) TRF = Trauma Receiving Facility (Level 5 equivalent)	СТС	RTC	ATH	СТН	TRF
trauma system activities. Reporting structure must include the TMD to ensure an opportunity to provide leadership and partnership for the benefit of the program.					
A Registered Nurse or Advanced Practice Clinician working in concert with the trauma director, with responsibility for organization of services and systems necessary for a multidisciplinary approach to care for the injured. Activities include completion of the on-line trauma coordinator course, clinical care and oversight, provision of clinical trauma education and prevention, performance improvement, provision of feedback to referring facility trauma programs, trauma registry, utilization of the MT Trauma Treatment Manual, and involvement in local, regional and state trauma system activities. There must be dedicated and adequate hours for this position.				Е	
A Registered Nurse, Advanced Practice Clinician or alternately a qualified allied health personnel working in concert with the trauma director, with responsibility for organization of services and systems necessary for a multidisciplinary approach to care for the injured. Activities include completion of the on-line trauma coordinator course, clinical care and oversight, provision of clinical trauma education and injury prevention, performance improvement, trauma registry, utilization of the MT Trauma Treatment Manual, and involvement in local, regional, and state trauma system activities. There must be dedicated and adequate hours for this position.					Е
Must provide evidence of 36 hours of trauma related continuing education during the last 3 years.	Е	Е	Е		
Must provide evidence of 24 hours of trauma related continuing education during the last 3 years.				Е	Е
Hold current membership in a national or regional trauma organization.	Е	Е	Е		<u> </u>
Trauma Registrar/Registry Designated trauma registrar working in concert with the trauma coordinator, with responsibility for data abstraction, entry into the trauma registry and ability to produce a variety of reports routinely and upon request. At least 0.5 FTE dedicated to the trauma registry per 200-300 annual patient entries. (Entries are defined as all patients that meet NTDS and state-specific inclusion criteria. There must be sufficient dedicated hours for this position to complete a minimum of 80% of patient records within 60 days of the patient discharge date.	Е	Е	Е		
Identified trauma registrar or trauma coordinator with responsibility for data abstraction, entry into the trauma registry and ability to produce a variety of reports routinely and upon request. There must be sufficient dedicated hours for this position to complete a minimum of 80% of patient records within 60 days of the patient discharge date.				E	E
All staff members who have a registry role in data abstraction and entry, injury coding, ISS calculation, data reporting or data validation for the registry must: (1) complete the most recent version of the AAAM's	Е	Е	Е		

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent)					
RTC = Regional Trauma Center (Level 2 equivalent)					
ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
Abbreviated Injury Scale (AIS) course within 12 months of hire; and (2)					
participate in a trauma registry course and ICD-10 course or refresher course					
every 5 years.	-	_	_		
Trauma Registrar (at least one) must currently be a Certified Abbreviated	E	E	Е		
Injury Scale Specialist (CAISS)				Г	Г
The trauma registrar/trauma coordinator must attend, or have previously				Е	Е
attended, within 12 months of hire a trauma registry training with the State					
Trauma Coordinator. Active and timely participation in the State Trauma Registry (cases	E	Е	Е	Е	Е
should be current per ARM 37.104.3014, which is 60 days following close of	E	E	E	E	E
the quarter).					
Trauma Registry data must be collected in compliance with the NTDS	Е	Е	Е	Е	Е
inclusion criteria and Montana Trauma Registry specific criteria.	L				
Registry data must have been submitted to the TQP Data Center (if ACS	Е	Е	Е		
verified) and Montana Trauma Registry in the most recent call for data.	_		_		
Registry data must have been submitted to the Montana Central Site in the				Е	Е
most recent call for data.					
Must have a written data quality plan that details a process for measuring,	Е	Е	Е	D	D
monitoring, identifying and correcting data quality issues and ensures data is					
fit for use. Requires at least a quarterly review of data quality.					
Trauma Registrar must accrue at least 24 hours of trauma-related continuing	E	Е	Е	D	D
education (CE) during the previous 3 years.					
Trauma Committees		1	T		1
Multidisciplinary Trauma Committee functions with a multidisciplinary	E	Е	Е	E	E
committee which includes representation from all trauma related services to					
assess and correct global trauma program process issues. This committee is					
chaired by the TMD with the major focus on PI activities, policy					
development, communication among all team members, development of					
standards of care, education, outreach programs, and injury prevention. The committee oversees the implementation of the process which includes all					
program related services, meets regularly, takes attendance, maintains					
minutes, and works to correct overall program deficiencies to optimize					
patient care.					
Multidisciplinary Trauma Peer Review requires attendance of medical staff	Е	Е	Е	Е	Е
active in trauma resuscitation, including the trauma coordinator, to review	L				
systemic issues and/or provider issues, as well as proposed improvements to					
the care and safety of the injured. Must meet regularly and document					
comprehensive minutes that capture the essence of the discussion and					
consensus of the participants and documenting loop closure. Must				1	
systematically review mortalities, significant complications, and process					
variances associated with unanticipated outcomes and determine					
opportunities for improvement.					
The trauma medical director ensures dissemination of information and	E	Е	E	Е	Е
findings from the trauma peer review meetings to the medical providers not					
attending the meeting.					

TRAUMA FACILITY CRITERIA	LEVELS				
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent) TRF = Trauma Receiving Facility (Level 5 equivalent)	СТС	RTC	АТН	СТН	TRF
Must adopt/utilize evidence-based clinical practice guidelines/protocols/algorithms that are reviewed at least every three years.	Е	Е	Е	Е	Е
Trauma System Participation					
There is active involvement by the hospital trauma program staff in state/regional trauma system planning, development, and operation.	Е	Е	Е	Е	Е
Participation in the statewide trauma system including participation in at least 50% of Regional Trauma Advisory Committees; support of regional and state performance improvement programs; and submission of data to the Montana State Trauma Registry.	Е	Е	Е	Е	Е
Prehospital Trauma Care					
The trauma program reviews pre-hospital protocols and policies related to care of the injured patient. A physician/provider from the ED or trauma program must participate in the prehospital Performance Improvement (PI) process, including assisting EMS agency medical directors in the development and adoption of prehospital care protocols relevant to care of the trauma patient.	Е	E	Е	Е	Е
The trauma program reviews pre-hospital protocols and policies related to care of the injured specialty patient: Pediatrics, Geriatrics, Obstetrical	Е	Е	Е	Е	Е
Trauma team activation criteria have been provided to EMS and are readily available to allow for appropriate and timely trauma team activation.	E	Е	Е	Е	Е
EMS has representation on the multidisciplinary trauma committee or documentation of involvement where perspective and issues are presented and addressed.	Е	Е	Е	Е	Е
Review of prehospital trauma care is included in the trauma performance improvement program.	Е	Е	Е	Е	Е
EMS is provided feedback through the trauma performance improvement program, which includes accuracy of triage and provision of care, outcomes of their patients and any potential opportunities for improvement in initial care.	Е	Е	Е	Е	Е
Participates in the training of prehospital personnel.	Е	Е	Е	D	D
PERSONNEL & SERVICE RESOURCES					
General / Trauma Surgeon					
Full, unrestricted general surgery privileges	Е	Е	Е	Е	
Board-certified or board eligible	E ¹	E^1	E^1	\mathbf{D}^1	
ATLS course completion	Е	Е	Е	Е	
Must remain current in board-certification to satisfy CME requirements.	Е	Е	Е	Е	
Attendance of each of the general surgeons at a minimum of 50% of the trauma peer review committee meetings.	Е	Е	Е	Е	
Must have trauma surgery coverage by senior (PGY3, 4 or 5) general surgery residents and/or fellows from an accredited ACGME program.	Е				
Published back-up schedule and dedicated to a single hospital when on call or performance improvement process in place to demonstrate prompt general surgeon availability.	Е	Е	D	D	

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent)					
ATH = Area Trauma Hospital (Level 3 equivalent)					
CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
Must have a documented backup plan for trauma surgery which must include			Е	Е	
transferring patients requiring surgery to a higher level of care when trauma					
surgery is unavailable.					
Process in place to assure the on-call general surgeon is notified and	Е	E	E	Е	
responds to the ED within the required time frame for trauma patient					
resuscitation. The trauma performance improvement process will monitor					
each surgeon's notification and response times.	Г	Г	Г	Г	
Trauma surgeon must be present in the operating suite for the key portions of the surgical procedures for which they are responsible and must be	Е	Е	Е	Е	
immediately available throughout the entire procedure.					
Shared roles and responsibilities of trauma surgeons and emergency	Е	Е	Е		
medicine physicians must be defined and approved by the TMD.					
Emergency Medicine		•	•	•	•
Physicians must be board-certified or board eligible in emergency medicine.					
	E^1	E^1	_1	_1	
Physicians must be board-certified or board eligible in emergency medicine			E^1	E^1	
or a specialty other than emergency medicine.	E^1	E^1	E^1	\mathbf{D}^{1}	\mathbf{D}^1
Emergency Department physician medical director must be board-certified or board eligible.	E.	E.	E.	D.	D.
Emergency Department covered by medical providers qualified to care for	Е	Е	Е	Е	Е
patients with traumatic injuries who can initiate resuscitative measures.					_
A board-certified or board eligible emergency medicine physician must be	E^1	E^1	D		
present in the ED at all times.					
Emergency Department coverage may be physician, physician assistant, or				E	E
nurse practitioner on-call and promptly available.					
Must remain current with board certification to satisfy CME requirements. If	Е	Е	E	E	Е
functioning as an ED provider or providing care in the ED for patients					
outside of current board-certified specialty and/or are an Advanced Practice Practitioner, current ATLS is required.					
CALS (Comprehensive Advanced Life Support) Provider certification					
(WITH completion of CALS Trauma Module) may substitute for ATLS				Е	Е
recertification for Community & Trauma Receiving Facilities.					_
Provider must be current in or be pursuing the most recent ATLS edition					
before CALS may be substituted for recertification.					
Emergency Department trauma liaison (may be Trauma Medical Director if	E	E	E	Е	E
ED Provider serves in that role).	2		2		
Attendance of an emergency physician representative at a minimum of 50%	E^2	E^2	E^2	E^2	
of the trauma peer review committee meetings.					E^2
Attendance of all ED providers at a minimum of 50% of the trauma peer review committee meetings.					E-
Anesthesia – MD or CRNA		<u> </u>	<u> </u>		
Board certified or board eligible anesthesiologist trauma liaison.	Е	Е	D	D	
Anesthesia trauma liaison.	E	E	E	E	
L				1	

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent)					
ATH = Area Trauma Hospital (Level 3 equivalent)					
CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
CRNAs and certified anesthesiologist assistants who are licensed to practice			Е	Е	
independently can serve as anesthesia liaison.					
Attendance of anesthesia representative at a minimum of 50% of the trauma	Е	Е	Е	Е	
peer review committee meetings. The availability of anesthesia and the absence of delays in airway control	Е	Е	Е	Е	
and operative anesthesia management must be identified and reviewed to	L	L	L	E	
determine reasons for delay, adverse outcomes and opportunities for					
improvement.					
Anesthesia services must be available within 15 minutes of request, and	Е	Е			
attending anesthesiologist must be present within 30 minutes of request of all					
operations.					
Anesthesia services must be available within 30 minutes of request.		L	Е	D	
Neurosurgery E*: Applies only to Area Trauma Hospitals with neurot			ies.	ı	
Board-certified or board-eligible neurosurgeons continuously available for care of the neurotrauma patient.	E^1	E^1			
Board-certified or board-eligible neurosurgeons.			E ¹ */		
Board-certified of board-engible fleurosurgeons.			\mathbf{D}^1		
ATLS course completion.	D	D	D		
Must remain current in board-certification to satisfy CME requirements.	Е	Е	E*/D		
Board-certified or board eligible neurosurgical trauma liaison.	E^1	E^1	E ^{1*} / D ¹		
Attendance of a neurosurgery representative at a minimum of 50%	E^2	E^2	E ^{2*} /		
multidisciplinary peer review committee meetings.			D^2		
Neurosurgical evaluation must occur within 30 minutes for any patient with	Е	Е	E*/D		
severe TBI (GCS <9), moderate TBI (GCS 9-12) with evidence of					
intracranial mass lesion, neurologic deficit from spinal cord injury, or at the discretion of the trauma surgeon.					
Must have a written plan approved by the TMD that defines the types of			Е	D	
neurotrauma injury that may be treated at the center.			L	1	
Must have a neurotrauma contingency plan for when neurosurgery	Е	Е	E*/D		
capabilities are encumbered or overwhelmed.					
Orthopedic Surgery E*: Applies only with orthopedic capabilities					
Board certified or board eligible orthopedic surgeons continuously available	E^1	E^1	\mathbf{E}_{1}		
for the care of trauma patients and must have a contingency plan for when					
orthopedic trauma capabilities become burdened or overwhelmed.	-	-	-	-	
ATLS course completion.	D	D	D	D	
Must remain current in board-certification to satisfy CME requirements.	E E ¹	E E ¹	E E ¹	D D ¹	
Board-certified or board eligible orthopedic trauma liaison. Orthopedic trauma liaison must have completed an orthopedic traumatology	E.	E.	E.	D.	
fellowship approved by the Orthopaedic Trauma Association.	E				
Attendance of an orthopedic surgery representative at a minimum of 50% of the trauma peer review committee meetings.	E ²	E^2	E^2	E*	
Orthopedic surgeon must be at bedside within 30 minutes of request for any	Е	Е	Е		
patient that is hemodynamically unstable due to pelvic fracture, has					

TRAUMA FACILITY CRITERIA			LE	VELS	
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent)					
RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent)					
CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
suspected compartment syndrome, fractures/dislocations at risk for avascular					
necrosis or vascular compromise, or at the discretion of the trauma surgeon.					
Must have treatment guidelines in place for orthopedic injuries, including	Е	E	E	D	
pelvic ring fractures, long bone fractures, open extremity fractures, and hip					
fractures in geriatric patients.					
Radiologist				I	
Board certified or board eligible.	Е	Е	Е		
Board-certified or board eligible radiologist trauma liaison.	E	E	E	- 2	- 2
Attendance of a radiologist representative at a minimum of 50% of the	E^2	E^2	E^2	D^2	D^2
trauma peer review committee meetings.		_		_	_
A radiologist must have access to patient images and be available for	Е	Е	Е	D	D
imaging interpretation, in person or by phone, within 30 minutes of request.					
Interventional Radiology		1	1	T	1
Necessary human and physical resources continuously available to provide	E	E	D		
endovascular or interventional radiology procedure for hemorrhage control					
within 60 minutes of request and arterial puncture.					
- Critical Care Physician	_	г_	Τ	ı	T
Board-certified or board-eligible critical care physician.	Е	Е	Е		
Critical Care surgical director board-certified or board-eligible in surgical	Е				
critical care and actively participates in Critical Care administration. May be					
the TMD.		Г	Б		
Critical Care surgical director board-certified or board-eligible in general		E	D		
surgery and actively participates in Critical Care administration. May be the TMD.					
At least one intensivist must be board-certified or board eligible in surgical		Е			
critical care.					
Critical Care/Hospitalist trauma liaison.				D	
Attendance of a critical care physician representative at a minimum of 50%	E	E	E	D	
of the trauma peer review committee meetings.					
Advanced Practitioners					
Advanced practitioners who participate in the initial evaluation of trauma	Е	Е	Е	Е	Е
patients must demonstrate currency as an ATLS provider.					
Geriatric Provider					
A geriatric provider trauma liaison (may be a geriatrician, physician with	Е	Е	D		
expertise and a focus in geriatrics, or an advanced practice provider with	1				
certification and expertise in geriatrics).					

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent)					
RTC = Regional Trauma Center (Level 2 equivalent)					
ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent)					
TRF = Trauma Receiving Facility (Level 5 equivalent)					
Additional Medical Specialists				,	
Pain Management (with expertise to perform regional nerve blocks)	E	Е	D		
Physiatry	_				
Psychiatry	E	E	D		
	Е	Е	D		
Institutionally defined, response parameters for consultants addressing time-	Е	Е	Е	D	
critical injuries should be determined and monitored. Variances should be	~	_	-	-	
documented and reviewed regarding reason for delay, opportunities for					
improvement and corrective actions.					
*Must have continuous availability of the following surgical specialties:		II.			
*Cardiothoracic surgery	Е	Е			
Craniofacial expertise	Е	D			
*Hand surgery	Е	Е	D		
*Obstetric/Gynecologic surgery	Е	Е	D	D	
*Ophthalmic surgery	Е	Е	D		
*Otolaryngology	Е	Е	D		
*Plastic surgery	Е	E	D		
*Replantation Services (if not continuously available must have a	Е	E	D		
triage and transfer process with a replant center).					
Soft tissue coverage including microvascular for free flap	Е	D			
coverage.		_	_		
*Urologic surgery	E	Е	D		
*Vascular surgery	Е	Е	D		
*Must have continuous coverage of the following medical specialists:	L	L	L		
* Cardiology	Е	Е	Е		
*Gastroenterology	Е	Е	Е		
*Internal medicine or pediatrics	Е	Е	Е		
*Infectious Disease	Е	E E	Е		
*Nephrology	Е		Е		
*Pulmonary Medicine	Е	Е	Е		
FACILITIES/RESOURCES/CAPABILITIES					
Emergency Department	E1	E1			
A board-certified or board-eligible emergency physician must be present in	E^1	E^1			
the emergency department at all times.	 		Г		
If the in-house emergency medical provider must be temporarily out of the	1		Е		
department to cover in-house emergencies, there must be a Performance Improvement (PI) process in place to assure that care of the trauma patient is	1				
not adversely affected	1				
not advolvery affected	L	1		<u>I</u>	

TRAUMA FACILITY CRITERIA	LEVELS				
	CTC	RTC	ATH	СТН	TRF
CTC = Comprehensive Trauma Center (Level 1 equivalent)

PERFORMANCE IMPROVEMENT					
There is a comprehensive, written performance improvement (PI) plan	Е	Е	Е	Е	Е
outlining the PI process, organizational structure, event identification, list of					
audit filters and defined levels of review. Needs to be reviewed annually.					
The Trauma PI program must be independent of the hospital or departmental	Е	Е	Е	D	D
PI program, but it must report to the hospital or departmental PI program.					
Must have documented evidence of event identification, effective use of	Е	Е	Е	Е	Е
audit filters, demonstrated loop closure, and attempts at corrective actions					
and strategies for continued improvement over time.					
There is a process to identify the trauma patient population for performance	E	E	E	E	E
improvement review.					
At least 0.5 FTE dedicated PI personnel (if annual volume exceeds 500	E	E	E		
patient entries) and 1.0 FTE if volume >1000 patient entries that meet NTDB					
and State inclusion criteria	_	_	_	_	_
The results of issue analysis will define corrective action strategies or plans	Е	E	E	E	E
that are documented.	-		-		-
Use of telehealth for collaborative care of the trauma patient requires	Е	E	E	Е	Е
inclusion of the off-site service in the PI process.	E	E	E	D	
All nonsurgical services admissions should be subject to individual case	Е	Е	Е	D	
review to determine rationale for admission onto a non-surgical service, adverse outcomes, and opportunities for improvement.				1	
adverse outcomes, and opportunities for improvement.	1			1	1

TRAUMA FACILITY CRITERIA	LEVELS				
CTC = Comprehensive Trauma Center (Level 1 equivalent) RTC = Regional Trauma Center (Level 2 equivalent) ATH = Area Trauma Hospital (Level 3 equivalent) CTH = Community Trauma Hospital (Level 4 equivalent) TRF = Trauma Receiving Facility (Level 5 equivalent)	СТС	RTC	ATH	СТН	TRF
Neurotrauma care should be routinely evaluated for compliance with the Brain Trauma Foundation Guidelines.	Е	Е	Е	D	
All trauma deaths and transfers to hospice must be reviewed to identify opportunities for improvement. Deaths must be categorized as either: Mortality with opportunity for improvement; or Mortality without opportunity for improvement.	Е	Е	Е	Е	Е
Must have standardized treatment protocols for geriatric trauma management.	Е	Е	D	D	D
All transfers of trauma patients to a higher level of care both within the hospital and via interfacility transfer must be routinely monitored, and identified cases reviewed to determine rationale for transfer, adverse outcomes, and opportunities for improvement.	Е	Е	Е	Е	Е
Must have protocols and processes in place that determine the rehabilitation needs and services required during the acute inpatient stay and to determine the level of care patients require after discharge.	Е	Е	Е		
The trauma program participates in benchmarking with other facilities of the same designation level to identify how the trauma center performs compared to others.	Е	Е	Е	Е	Е
PATIENT CARE EXPECTATIONS & PROTOCOLS					
Diversion		ı		1	
A written policy and procedure to divert patients to another designated trauma care service when the facility's resources are temporarily unavailable for optimal trauma patient care. Must include a process for notification of affected EMS services and outlying facilities.	Е	Е	Е	Е	Е
All trauma patients who are diverted to another trauma center, acute care hospital, or specialty center must be subjected to performance improvement case review. Documentation showing reasons for, and duration of diversion is required.	Е	Е	Е	Е	Е
Diversion cannot exceed 400 hours during the reporting period and all instances must be reviewed by the trauma committee.	Е	Е	Е	Е	Е
Organ Procurement		1			
Must have an affiliation with an organ procurement organization.	Е	Е	Е	Е	Е
Must have a written policy for notification of the regional organ procurement organization.	Е	Е	Е	Е	Е
Must have protocols defining clinical criteria and confirmatory tests for the diagnosis of brain death.	Е	Е	Е	D	D
Inter-Facility Transfer		ı		1	
Must have clearly defined transfer protocols that include the types of patients and expected time frame for initiating transfer to predetermined referral centers for outgoing transfers.	Е	Е	Е	Е	Е
Decision to transfer a patient must be based solely on the needs of the injured patient without consideration of their health plan, payor status, or affiliation with a healthcare system.	Е	Е	Е	Е	Е

the center participates.	•					

INJURY PREVENTION & DISASTER PRPAREDNESS					
Must provide public trauma/injury prevention education.	Е	Е	Е	Е	Е
The trauma center implements at least two activities over the course of the 3-	E	E	E	E	E
year designation period with specific objectives and deliverables that address					
separate major causes of injury in the community.					
The trauma center has a designated injury prevention coordinator or	Е	Е	Е	Е	Е
spokesperson (can be the trauma coordinator/trauma program manager for					
ATH, CTH & TRF), with adequate hours to perform duties.					
Identified injury prevention professional must be someone other than the	Е	Е	D		
trauma program manager or PI personnel.					
Injury prevention priorities are based on local/state data.	Е	E	Е	Е	Е
Demonstrates evidence of partnerships with community organizations to	Е	Е	Е	Е	Е
support injury prevention efforts.					
Monitor progress / effect of prevention program	E	E	Е	D	D
Must screen at least 80% of all admitted patients over age 12 for alcohol	Е	Е	Е	D	D
misuse with a validated tool or routine blood alcohol content testing.					
At least 80% of patients who have screened positive for alcohol misuse must	Е	Е			
receive a brief intervention by trained staff and must be documented.					
At least 80% of patients who have screened positive for alcohol misuse must			Е		
have a mechanism for referral if brief intervention is not available as an					
inpatient.					
There is a protocol to screen patients at high risk for psychological sequelae	Е	Е	D		
with referral to mental health provider.					
A process for referral to a mental health provider when required.			Е	D	D
Disaster Preparedness		1			
There is a written emergency operation plan that is updated and	E	E	E	Е	E
exercised routinely.					
Ability to decontaminate single and multiple injured patients prior to entry to	Е	Е	Е	Е	E
the facility.					
Participation in regional disaster/emergency management activities	Е	E	Е	Е	E
including Local Emergency Planning Committee (LEPC), health care					
coalitions, and regional mass casualty exercises.					
The trauma surgeon liaison to the disaster committee must complete the	Е	D	D		
Disaster Management and Emergency Preparedness Course at least once.					
A trauma surgeon from the trauma panel must be included as a member of	E	E	Е		
the hospital's disaster committee and be responsible for the development of a					
surgical response to a mass casualty event.	_				
An orthopedic surgeon from the orthopedic trauma call panel serves as a	Е				
member of the hospital's disaster committee.	E	ļ	F		
The trauma program must participate in two hospital drills or disaster plan	Е	Е	Е	E	E
activations per year that include a trauma response and are designed to refine					
the hospital's response to mass casualty events. A facility that is involved in					
one or more real-world disaster events having a trauma component and					
requiring activation of the disaster plan is exempt from participating in drills.					

1 Alternate Pathway requirements include:

- a. Completion of training equivalent to that required by the United States or Canada.
- b. Evidence of 36 hours (12 hours annually prorated for new hires) of trauma-related CME during the verification cycle. For pediatric trauma care, 9 of 36 hours must be pediatric-specific CME.
- c. Hold current ATLS certification.

- d. Hold active membership in at least one national or regional trauma organization and attended at least one meeting during the reporting period.
- e. Trauma multidisciplinary PIPS committee meeting attendance rate of 50 percent or more during the reporting period.
- f. Credentialed to provide trauma care.
- g. Processes and outcomes of care must be comparable to that of other physicians.
- Trauma continuing education can be obtained in a variety of ways such as attending facility trauma committee and peer review meetings (attendance may be met through teleconferencing or videoconferencing participation.) which provide education, Regional Trauma Advisory Committee (RTAC) meetings and State Trauma Care Committee (STCC) meetings. External trauma-related education can be obtained outside of one's own institution and/or by educators from outside the institution.
- E* Applies only to Area Trauma Hospitals (Level III-N) with neurotrauma capabilities.

Brief description of trauma designation levels:

- Comprehensive Trauma Centers (CTC): Definitive comprehensive care for complex multisystem injured patients. Research conducted at facility. Residency program affiliation. Leader in professional and community education and system planning.
- Regional Trauma Centers (RTC): Initiate and provide definitive care for all injured patients. Assists with leadership for a geographical area or in lieu of CTC, which includes outreach to small facilities within the same service area.
- Area Trauma Hospitals (ATH): Provide prompt assessment, resuscitation, surgery, intensive care, and stabilization for most injured patients.
- Community Trauma Facilities (CTF): Provide evaluation, stabilization, diagnostic capabilities, and some surgical coverage for injured patients.
- Trauma Receiving Facilities (TRF): Provide initial evaluation, stabilization, and diagnostic capabilities prior to transfer to definitive care. No surgical capabilities at facility.
