

# Framework for Awarding Opioid Abatement Dollars

## Step 1: Understand the Unique Needs and Priorities in Your Community

### What does the data say?

Review the community health assessment data available on the problem of opioid use. Your <u>local health department</u> and <u>regional prevention specialist</u> can help you locate and interpret the latest available data for your community including the:

- Community Health Needs Assessment
- Youth Risk Behavior Survey
- Prevention Needs Assessment
- Montana Overdose Indicators Dashboard

### What partnerships already exist?

Connect with groups already working collaboratively to prevent and address substance use disorders. Your local health department can help you interface with the leadership for these groups, which may include:

- Regional Opioid Education and Naloxone Distribution Programs
- Youth substance use prevention coalitions
- Local Advisory Councils
- Crisis Response Coalitions
- Early Childhood Coalitions
- <u>DUI Task Forces</u>
- Drug Task Forces

#### What has your community prioritized?

Review any plans that have already been developed prioritizing opioid abatement strategies based on your community health data including the:

- The Montana Substance Use Disorders Strategic Plan
- Community Health Improvement Plans
- Tribal Opioid Response plans
- Strategic plans from local coalitions and organizations working to prevent substance use and address opioid use

Familiarize your board with how these key partners are organized and funded, and consider ways that your abatement region dollars can be braided to supplement (not supplant or duplicate) their work to increase its impact and sustainability.

#### Step 2: Understand What Works to Address Opioid Use

Once you understand the data, partnerships and priorities in your community, review evidence-based strategies and existing resources available to address opioid use. Gain insight into what works across the entire continuum of care from prevention to recovery.

Primary Prevention Strategies	Resources
<ul> <li>Local youth prevention coalitions</li> </ul>	<ul> <li>Communities that Care</li> </ul>
<ul> <li>Education for youth and families</li> </ul>	<ul> <li>The Good Behavior Game</li> </ul>
<ul> <li>School-based prevention programs</li> </ul>	<ul> <li><u>Parenting Montana</u></li> </ul>
<ul> <li>Home visiting and parental supports for at-</li> </ul>	<ul> <li>Healthy Montana Families Home</li> </ul>
risk families	<u>Visiting</u>
