imMTrax & Your Teen

Information for Parents

What is *imMTrax*?

Montana's Immunization Information System (imMTrax) is a confidential computer program that can hold immunization records for Montanans of all ages. imMTrax combines records from multiple immunization providers to form **one shot record.**

imMTrax helps healthcare providers make sure Montana's kids, teens, and adults are protected from serious diseases.

imMTrax is provided by the Montana Department of Public Health and Human Services.

How can imMTrax *help my family?*

Preserve Your Child's Shot Record

Before reaching adulthood, children and teens receive several shots to prevent serious diseases. imMTrax keeps their immunization history in one record, even if your family moves or changes healthcare providers.

Once entered into imMTrax, the record will be available when they need it for future:

- School Entry
- College Admission
- Employment
- Travel

Improve Your Child's Medical Care

imMTrax combines records from multiple immunization providers to form one shot record. Having one imMTrax record allows your healthcare provider to make sure your teen is up-to-date with their shots.

Participating in imMTrax

Many healthcare providers seeing children and teens in Montana participate in imMTrax. Ask your provider to be sure.

Whether your child's immunization records are accessible in imMTrax is 100% up to you. Montana rules say that consent must be given by a parent or guardian for records to be made accessible in imMTrax. Consent can be withdrawn at any time.

imMTrax Records Commonly Include:

- » Name, Birth Date, and Gender
- » Parent/Guardian Name , Address, and Phone Number
- » Shot History
