

Ordering Tests on the Order Patient Samples screen

There are two ways to search for a test on this screen.

(1) Start typing in the Order Choice Search field.

Order Choices

Order Choice Search:

Type in the field below to search for a test
or search by selecting a list below

Diagnoses:

Filter by List:

Order Choice	ICD Codes	Sample ID	Priority	Billing	Cancel
To select an order choice, type in the text box or select an order choice list.					

When you start typing, the Order Choice Search screen will appear, filtering on the words you type.

This Order Choice Search screen should always default to the “Orderable tests” list.

Order Choice Search

Order Choice Name:

☐ Search All Order Choices
☒ Search Order Choice List:
☐ Search Profiles

entries

Showing 1 to 3 of 3 entries

Select	Abbreviation	Name(s)	Collection Information	Storage Temperature	CPT Codes
<input type="checkbox"/>	SARS-CoV-2	SARS Coronavirus 2; COVID-19, COVID	Respiratory in Sterile Container with Swab	Refrigerated	87635CV
<input type="checkbox"/>	SARS-CoV-2 (Panther)	SARS-CoV-2 (Panther); COVID, COVID-19, Aptima	Respiratory in APTIMA transport	Refrigerated	87635CV
<input type="checkbox"/>	SARS-COV-2 TrimericS IgG	SARS-COV-2 TrimericS IgG; COVID Antibodies	Serum in Serum Tube	Ambient Temperature	86769

(2) Use the Filter By List dropdown.

This will give you the same order choice search screen, but it will list all the tests contained in the list you choose.

Order Choices

Order Choice Search:

Type in the field below to search for a test

or search by selecting a list below:

Filter by List:

Summary

Sample ID

Priority

Billing

Cancel

For example, by picking COVID from the dropdown list, the Order Choice Search screen appears filtered to all the COVID tests

Order Choice Search

Order Choice Name:

☐ Search All Order Choices

☒ Search Order Choice List:

COVID

☐ Search Profiles

Show 20 entries

Showing 1 to 3 of 3 entries

Select	Abbreviation	Name(s)	Collection Information	Storage Temperature	CPT Codes
<input type="checkbox"/>	SARS-CoV-2	SARS Coronavirus 2; COVID-19, COVID	Respiratory in Sterile Container with Swab	Refrigerated	87635CV
<input type="checkbox"/>	SARS-CoV-2 (Panther)	SARS-CoV-2 (Panther); COVID, COVID-19, Aptima	Respiratory in APTIMA transport	Refrigerated	87635CV
<input type="checkbox"/>	SARS-COV-2 TrimericS IgG	SARS-COV-2 TrimericS IgG; COVID Antibodies	Serum in Serum Tube	Refrigerated	86769

You can still type in the Order Choice Name field to search for a specific test, but it will be filtered to the Order Choice List chosen (in this case COVID).

Once you are on the Order Choice Search screen, it works the same no matter how you got there.

It will filter the tests based upon the Order Choice List selected. As you type in the Order Choice Name field, it will filter the list based upon what you type.

If you blank out the Order Choice Name field, it will show all the tests within the list selected.

You can switch lists on this screen as well. The Orderable tests list should contain any test that can be ordered by a facility (there are other tests we run which are reflexed or attached but aren't available to order by themselves).

Search All Order Choices radio button

If you can't find what you are looking for, you can attempt to use "Search All Order Choices." Use "Search All Order Choices" only as a last resort if you can't find what you are looking for. A better option would be to call us so we can help. If you find what you are looking for in the "All Order Choices" list but not the Orderable tests list, please let us know because we may not have a test on the Orderable tests list that should be.

Search Profiles radio button

The Search Profiles option will show you tests grouped into a Profile. The only two profiles we have currently are TICK and MMR. The TICK profile will order all tests in the tick panel, and the MMR profile will order Measles, Mumps and Rubella IgG serology tests.

If you click on the Collection Information button, a screen will appear that shows each test that will be ordered for that profile.

The screenshot displays the 'Order Choice Search' window. At the top, there is a search bar labeled 'Order Choice Name:' and three radio buttons: 'Search All Order Choices', 'Search Order Choice List: Profiles' (which is selected), and 'Search Profiles'. Below this is a table with columns: 'Select', 'Abbreviation', 'Name(s)', 'Collection Information', 'Storage Temperature', and 'CPT Codes'. The table shows two entries: 'MMR' (Measles Mumps and Rubella) and 'Tick' (Tick Panel). A modal window titled 'Collection Information' is open, showing details for the 'Measles Mumps and Rubella' profile. The modal contains three sections: 'Measles (Rubeola) IgG Serology', 'Mumps IgG Serology (EIA)', and 'Rubella IgG Serology IU/mL (EIA)'. Each section lists 'Tube/Container:', 'Minimum Required Yield:', and 'Container Count:' with corresponding values. A 'Close' button is at the bottom right of the modal.

Select	Abbreviation	Name(s)	Collection Information	Storage Temperature	CPT Codes
<input type="checkbox"/>	MMR	Measles Mumps and Rubella	Collection Information		
<input type="checkbox"/>	Tick	Tick Panel	Collection Information		

Collection Information			
Measles Mumps and Rubella			
Measles (Rubeola) IgG Serology			
Tube/Container:	Serum Tube	Sample Type:	Serum
Minimum Required Yield:	1.0	Storage Temperature:	Refrigerated
Container Count:	1		
Mumps IgG Serology (EIA)			
Tube/Container:	Serum Tube	Sample Type:	Serum
Minimum Required Yield:	0.0	Storage Temperature:	Refrigerated
Container Count:	1		
Rubella IgG Serology IU/mL (EIA)			
Tube/Container:	Serum Tube	Sample Type:	Serum
Minimum Required Yield:	1.0	Storage Temperature:	Refrigerated
Container Count:	1		

For some things, multiple tests need to be ordered. Rules have been built that will add tests when they should be ordered together. For example, when ordering an AFB Culture, the system will automatically also order an AFM Smear, and visa-versa. This will happen when you save the order.

Order Choice Information

Once you have added a test and are back on the Order Patient Samples screen, you can click on that test to bring up the Order Choice Details screen for that test.

Container Count: 1

Instructions:

Info:

Host Code: VDRL

Diagnoses: Syphilis Serology, CSF

No diagnosis codes have been selected.

The Description of the test may have useful details when determining if that is the correct test to order.

Clinical Information

Every order should ask you to answer at least one clinical information question when you save the order.

The one question that is always needed is specimen source. This is how you tell us the sample type that you are sending.

Clinical Information

Clinical Info

Order Choices	Clinical Info	Response
AFB Smea	Specimen Source:*	<div></div>
	Additional Note	<div></div>
		<div></div>

You can pick from the drop-down menu or start typing to find the sample type. The additional Note field should be used when you need to communicate additional information about the sample, such as the source site (i.e., left lung). Also, if submitting an isolate versus a primary sample, please type “isolate” in the additional note field.
